### HILLCREST COLLIERIES SHOWING VERY STRONG FINANCIAL POSITION

A Montreal dispatch says: A stronger  
market has recently developed for  
Hillcrest Collieries common on the  
local market, the stock standing at  
66 bid today, with very little offer  
at that price. This strength is regard-  
ed as reflecting the strong financial  
position of the company as shown in  
their last annual report when net  
working capital amounted to \$452,  
097, a sum sufficient to retire their  
entire bond issue. As an indication of  
the strong earnings position of the  
company, their report for the year  
ended Dec. 31 last, a year of industrial  
depression showed net profit  
amounting to \$117,414, or equal to  
6.8 per cent. earned on the common  
stock.

Part of the British Columbia  
and Alberta Electric power line  
bear design signs, "66 000 Volts,"  
and a Blairmore woman has con-  
nected her wire clothes line to one  
of these poles. She evidently  
does not believe in overloading,  
but a good stiff jolt is in a while.

### J. E. Gillis, B.A.

Barrister and Solicitor  
Blairmore, Alberta,  
and

### D. G. Mackenzie

late of the firm of  
McDonald, Martin & Mackenzie,  
Barristers and Solicitors,  
Macleod, Alberta.

By arrangement they have now  
associated in partnership at Blair-  
more under the firm name of

**Gillis & Mackenzie**

### CHAUTAUQUA COMMITTEE MEETS

A well-attended meeting of the  
Chautauqua committee was held at  
the office of The Enterprise on Fri-  
day last, when a reorganization took  
place, Mr. E. M. Pinkney was chosen  
chairman, Mr. A. J. Kelly secretary  
and Mr. W. A. Henderson treasurer.  
Messrs. J. A. McDonald and W. J.  
Bartlett were given charge of the ad-  
vertising.

The meeting was attended by Miss  
Wallace, special advance representa-  
tive from Calgary.

The committee are pleased with the  
excellent programme offered this  
year, and despite the prevailing strike  
are confident that with proper sup-  
port and co-operation of the public,  
this year's Chautauqua festival will  
be the most successful yet. In  
our next issue we will give a brief  
outline of the programme.

Following is the list of signatures  
to this year's Chautauqua:

W. J. Bartlett, A. J. Kelly, G. N.  
Elwin, Mar. Por, J. P. O'Neill, J. H.  
Farmer, Henry Zak, M. Belecky, A.  
A. McGee, Paul Barattelli, L. Comfort,  
G. W. Gresham, J. B. Wilson, L. L.  
Morgan, M. G. Rhynas, A. McLeod,  
S. Trono, J. B. Hamer, C. E. M. Sar-  
toris, Dr. Olivier, D. M. J. Conway, W.  
A. Henderson, L. P. Roberts, W. W.  
Scott, F. M. Pinkney, H. H. Grie-  
bach, F. Celli, A. W. Robbins, J.  
Dimele, R. D. McMillan, Wm. Steven-  
son, Jr., J. M. Carter, H. Ryan, A.  
M. Morrison, Capt. W. J. Fisher, K.  
M. Brown, Harry Burns, J. A. Mc-  
Donald, J. A. Barbour, G. Cantalini,  
S. J. Lamey, J. E. Gillis, L. H. Put-  
nam.

Let's all get busy and make this  
year's Chautauqua the best yet.

### DEATH OF MRS. BERANEK

The death occurred at Michel on  
Saturday last of Mrs. Beranek, for-  
mer resident of Frank. Mrs. Beranek  
had been ill for a considerable time,  
and moved to Michel some months  
ago, where she could be cared for by  
her daughters residing there. She was  
in her fifty-second year. Her husband  
predeceased her four years ago.

The remains were brought to  
Blairmore on Monday and were laid  
to rest in the Protestant cemetery,  
beside those of her husband. The  
burial service was conducted by the  
chaplain of the Bohemian National  
Alliance. A large number of Michel  
people were joined by a large num-  
ber of friends from this district, fol-  
lowing the remains to their last rest-  
ing place.

### WILL HOLD ROLL CALL JUNE 14

Ray of Hope Rebekah Lodge will  
hold their Annual Roll Call at the  
Methodist church, Bellevue, on the  
night of Wednesday, June the 14th.  
This promises to be a most interest-  
ing event. Ray of Hope has the en-  
viable distinction of being the most  
progressive Rebekah lodge in the  
province since its institution a couple  
of years ago. They already have a  
membership of about 200.

### COWLEY HAPPENINGS

Rev. Dr. Ferguson, of Calgary, is  
a visitor here.

D. R. Melvor, of Gibbons, is a busi-  
ness visitor here for a few days.

F. W. Burgess, of Cranbrook, was  
a visitor here on Saturday.

Don't forget the Sports Day in  
Cowley on May 24th. Preparations  
are being made for a big time.

A number of Cowleyites attended  
the baseball game at Lundbreck on  
Friday night last.

Miss Hazel Blackburn, of Pincher  
Creek, was a week-end visitor in  
town.

On Sunday afternoon last George  
Fulton had the misfortune of losing  
his home by fire, the origin of which

**WASTED DOLLAR**

How often have you returned home on  
Saturday night, after having spent \$5 or  
without any particular pleasure of profit?  
Wouldn't it have been better for your  
future if—instead of spending the money,  
you had deposited it to the credit of your  
savings account?

Think it over! Open a savings account  
pay-day at our nearest branch, and let  
your spare dollars.

Blairmore

is unknown.

Rev. H. S. Woods, who has been  
here for two weeks, left on Tuesday  
for Magrath, where he has been called  
to preach.

On account of Miss Bernice Ander-  
son being laid up with a cold, the  
junior room of the school here was  
closed the early part of the week.  
Frank Siler has returned home  
from Lethbridge, where he had a ser-  
ious operation performed. We are  
glad to say he is getting on splendidly.

James Leigh was suddenly called  
to Drumheller on Monday night, on  
account of his sister-in-law, Mrs.  
J. A. Crawford (nee Miss Jennie  
Ryan) being dangerously ill. He went  
by motor.

### STOPPING AUTOMOBILE KILLING

Such frequent killings by automobiles in this city ought to be stopped. It can be stopped. Detroit has done it.

In that city they have reasonable traffic laws and strict enforcement. When a speeder is convicted, instead of being released with a nominal fine he is sent to jail. It is estimated that 40 lives have been saved in Detroit each month since that practice was adopted. Detroit had 240 deaths in 1920, and but 134 in 1921. At the present rate this year the death rate will be reduced to less than 100, although the number of cars is increasing. One judge in Detroit this year has sentenced 161 speeders and 31 "reckless drivers" to jail.

What Detroit is doing Chicago can do. We need only a slight change in the state vehicle laws. If our speeders' court will send guilty drivers to jail, speeding and reckless driving will be so reduced as to save hundreds of lives and thousands of dollars now lost in wrecks. Action of the court to that end will receive the support not only of every pedestrian in Chicago but of every sane and reasonable motorist. Jail the speeders.—Chicago Tribune.

### BETTING IN

A private telephone apparently no longer protects from having people listen in on a conversation.

The Society for Electrical Development announces that an inventor has perfected a radio-phone device that enables him to eavesdrop on talk passing over telephone wires.

Inventor Profit, experimenting with this radio-phone, wired his amplifier in some peculiar way that is being kept secret. Immediately he began to hear local telephone conversations—which he repeated to the talkers, amazing them.

While Profit's device still is in an embryonic stage of development, it opens up a vast new field for the wireless.

The listening in process is carried a step further by Profit's radio discovery. It is not impossible that there may soon be a wireless device able to pick up private conversations in distant homes, offices or rendezvous of criminals.

The idea seems uncanny now. So did the wireless telegraph when Marconi first announced its invention. Winnipeg Tribune.

### A SAFETY DEVICE FOR ELECTRIC HEATERS

One of the drawbacks of electrical appliances for heating water and other liquids is that if by chance the current is switched on while the utensil, such as a kettle or urn, is empty, the element gets overheated, and is apt to burn out. In order to get over this difficulty some makers introduced a safety device in the form of a metal plug which melts at a comparatively low temperature and breaks the circuit, thus preventing overheating of the element. This method works fairly well, but it has the objection that in order to bring the utensil into action again a new plug must be inserted. A British firm has therefore devised a safety appliance which is equally effective in action but which does not involve any part requiring replacement. It consists of a simple mechanical arrangement which cuts off the current when the utensil boils dry. All that is necessary to restore conduction is to fill the utensil with water, when the device automatically resets itself.

### PEACE FOR COAL MINING DEPENDS ON REORGANIZATION

During 1890-1921 bituminous mines have been operated at an average of 214 days yearly. Considering 264 days as a full working year, the last days average 86 a year. The geological survey of the national government estimates that 37 per cent of the last days were owing to over-exposure of bituminous mines. The United States can use approximately 700,000,000 tons of bituminous coal annually, but these mines, according to the statistics of the survey and the present coal commission, could produce between 700,000,000 and 900,000,000 tons yearly. Except during the war—even then only temporarily—the days of miners' employment during a year have made no noticeable increase. Now mines have been opened, some of the old mines have been enlarged and more miners have been employed. But there has been but little if any more of regular work for men in mines already operating.

The Sage foundation believes that a guaranteed minimum of employment rather than higher rates of wages is what the bituminous miners need and should seek. Such a minimum would in effect form a fixed charge on the industry and probably make owners or operators unwilling to open new mines or unduly expand existing ones. Regularity of work for the miners would conduce to economic conduct of the industry. Economy and efficiency constitute its crying needs.—Spokesman Review.

### COLEMAN HAPPENINGS

John DeMille left here for Naples and John Gervais for Greece last week.

Miss Mary MacKenzie is in Blairmore hospital nursing Mr. Lamey, who has been ill with pneumonia.

Mrs. Chaput has returned to her home here after spending a pleasant day in Pincher Creek.

Mr. O. E. Payne, who worked in the printing office here for a while, has returned to his home in Hanna, Alberta.

Mrs. MacKenzie and little son arrived here on Thursday last and are moving into the rooms over Mr. A. Easton's store.

Mother's Day was commemorated in the Institutional church last Sunday. Both services were very appropriate and well attended.

Mr. Lavery, of Calgary, will speak in the Institutional church on Sunday evening next. His topic will be: "Who is to blame when boys and girls go wrong?"

Charlie Graham has secured a lease of the store next to Scott & Unsworth's, where he will carry a full stock of wares usually carried by painters and decorators.

Harry W. Clarke arrived home from Edmonton University on Monday morning. Mr. Clarke was successful on ten of the subjects on which he wrote and we offer him congratulations.

Social evil is like the old fashioned pole evil—sort of a cross between a running sore and certain death.

Acme Electric Co., Ltd.  
MOOSE JAW, SASK.

### INVENTIVE PESTS

We are now hearing much of the wireless telephone. We are assured that all the future telephone will have to do is to unpack a small instrument, put it to his ear and capture the nearest unsuspecting electrical current. Then the damage is done. We object to the proposed invention upon two counts. First, it is cruelty to the confiding current; secondly it is cruelty to the married man.

Imagine, if you can, what will happen to a married man when his wife captures the unsuspecting current and sends it off to find her husband. He may be in the midst of making a perfect putt at the 18th hole and then it's contrivance in his pocket rings. He answers it and hears this "John, did you mail these letters for me?" Of course, John did not. His whole game is spoiled.

We could write on indefinitely, giving reasons why this invention should be nipped in the bud and the inventor chloroformed, even if he hasn't reached the prescribed age of 60 years, but need go no further. Just quote one incident to any married man and he can give you a score of others. We recall to mind the applause which greeted the perfection of cold storage. What did this great inventor do for us. In the main, it has done nothing except to make the age of an egg a guessing contest. When you sit down to eat a meal of eggs at any place today it is a matter of speculation which is older, the eater or the egg; and we say this without any strict reservation as to age limits.

Yes, we are openly against wireless telephony upon humane grounds. Think of what will happen when every woman has her own portable telephone and suddenly is seized with an uncurbed desire to talk with Anabel or Angelina about fashions, bridge or her friends! Then imagine the way the currents will move when she is seeking out her belated husband from the sanctity of his club or pool-room?

There is no doubt of it but that wireless telephony is cruel. The electrical currents will all be tired out at the end of the day; so will be the husbands. Therefore, we oppose the invention on the grounds of inhumanity.—Toronto World.

### CONSISTENCY

A Pass merchant, who has been in the habit of repeatedly urging the local papers to boost for home patronage, this week had delivered to him thousands of pieces of printed stationery, the work of a Toronto house. To the town in which that merchant is located he is worthless and is not deserving of one cent of local patronage. This is a small cap, but we venture to say will fit more than one such character.

### NEW JUDGE IS D. A. McDONALD

OTTAWA, May 9.—It is understood that D. A. McDonald, K.C., L.L.B., a member of the firm of Bourne, McDonald & Denbry, has been appointed to the vacancy on the Supreme Court Bench in British Columbia made vacant by the death of Mr. Justice Clement.

Mr. McDonald, who was at one time a partner with S. Herchner, of Fernie, is a native of Glenora, Middlesex County, Ontario, where he was born forty-four years ago. He received his early education at Glenora High School, and before studying law he taught school for three years. He formerly practised in London, Ont., and then came to Fernie, B.C. In Vancouver he was first a partner in the firm of Craig, Bourne & McDonald, but since 1913 the name of the firm has been Bourne, McDonald & Denbry.

Mr. McDonald is a man of the highest integrity and held in much esteem, not only by his brother barristers, but by the public at large. He served for three years overseas, being adjutant of the 10th Battalion Canadian Railway troops under Major-General J. W. Stewart. He is a member of St. John's Presbyterian Church, is married and has one child 5 years of age.

### HILLCREST HAPPENINGS

(By Our Own Felix)

The allotment holders are busy these days getting them into shape.

Mrs. D. Howcroft returned a few days ago, after nursing Mrs. Tucker at Bellevue.

Mr. Altham, master mechanic, is the latest to join the Auto Club of Hillcrest with a new Ford.

Quite a number of our young people are getting to be very enthusiastic over golf, and scarcely have time to eat-supper through it.

W. Hutchinson, the Company's engineer, has just purchased an Oldsmobile from our enterprising garage man, Joe Fumigali.

Mr. A. Blacky, the town electrician, is the new owner of a McLaughlin Four, purchased through the Morrison agency, of Coleman.

M. Borio is busy these days with his new residence on Belgrade Avenue, which when completed will be one of the most up-to-date and handsome residences in Hillcrest.

Everyone will be pleased to learn that Mrs. Stirling Marshall has sufficiently recovered from her recent operation in Calgary to be able to return home.

Mr. Angelo, our shoe repairer, is a happy man these days, his family having arrived on Sunday morning from Sunny Italy—wife, son and daughter.—It is about twelve years since he saw them last.

The stoppage of work, as far as the mine is concerned at Hillcrest, seems to have given all property owners an impetus to attend to their property. Judging by all the painting and new additions, fences, lumber-wagon processions, etc., things are sure booming. A large addition is being built to the residence of Mr. Stevenson, the general manager. Both the Chinese restaurants have been painted up, also the church. When all is finished, Hillcrest will look like a new town.

### SAYS THEY ARE AMATEURS

In resigning from the London Newspaper Proprietors' association, Lord Northcliffe said: "Capitalists have come into Fleet street who have made fortunes in other industries, with no experience of newspapers at all, and it is unreasonable that they should take part in dictating conditions and wages of printers to those who have been associated with newspapers and printers all their lives." Lord Northcliffe refused to support a movement for the reduction of printers' wages.

### FLAPPERISMS

It's the girl with the prettiest ankles that sees the mouse first. Almost every girl can be stirred with a "spoon."

Many a girl's eyebrows are not so black as they are painted. A girl is known by the engagement ring she keeps.

Don't make the mistake of believing that the girl with the dreamy eyes isn't wide-awake.

A girl's heart is naturally light when she strikes a match.

In the beautiful air catches which girls build you will never find any wasbuds.

### MAIL CONTRACT

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 16th of June, 1922, for the conveyance of His Majesty's Mails, on a proposed contract for four years, twelve times per week on the route Bellevue and Hillcrest Railway station (Can. Pac.), from the Postmaster General's pleasure. Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Bellevue and Hillcrest and at the office of the Post Office Inspector: POST OFFICE INSPECTOR'S OFFICE, Calgary, 5th May, 1922. D. A. BRUCE, Post Office Inspector.

## Beginning Beekeeping

Some Advice on How and When to Start

The best time of the year to begin beekeeping is in the spring. It is possible the beginner before starting should pay a visit to other beekeepers and study the methods to pursue. In his bulletin on "Bees and How to Keep Them," the late F. W. Sladen, Dominion Apiarist, advises starting on a small scale, as nothing is so disheartening to the two venturesome as to lose his bees owing to a lack of experience. A couple of colonies are sufficient at first. With the gaining of knowledge and understanding, additions can be made. The first outfit need not exceed \$25 or \$30 if judgment is used. It is well to make the bees pay their way after the first outing. Colonies complete in their hives, may be obtained in May, or swarms may be obtained in June or early in July. The former should give a fair amount of surplus honey or a swarm or two the same season, but a swarm is not likely to produce much honey the first year, unless it is a very early one. The colony or swarm should be fairly populous, and should have a young fertile queen. Be sure that the apiary from which it comes is free from disease. If possible procure the bees in the neighborhood, as death is frequent from unskillful packing if the bees are brought from a long distance. Another reason for nearby buying is the less risk of disease from contact. The seller will too usually insist on the moving of the bees. If the colony is procured in April or May there will be less risk of loss than if transported later.

A method of buying bees that has come into favor is by weight, without combs, in boxes specially constructed for the purpose. Packed with care the bees will survive a journey of some length, lasting several days in fact, and will not be likely to carry brood disease after so long a separation from their combs if the food supplied is free from infection and they are compelled to build new combs. Colonies should be moved in autumn or early spring if the distance is less than two miles in order to avoid the return of many of the bees to the old location. Always bear in mind that the successful beekeeper is the one who has learnt how the bees will act under various conditions and the actions of the bees can be controlled.

## Preserving the Finny Tribe

Re-Stocking Northern Ontario Lakes With Fish Fry

The Game and Fisheries Department of the Dominion Government, with the co-operation of the Canadian National Railways, through transportation facilities, etc., have made extensive preparations for the restocking of all the principal lakes in the surrounding country adjacent to Port Arthur, Ont., with thousands and, in some instances, millions of whitefish and lake trout fry.

The distribution of this fish fry will be under the personal supervision of Mr. Wm. Kennedy, District Government Agent, Game and Fisheries Department, with, as before stated, the co-operation of the Canadian National Railways in so far as transporting this fry in barrels from the various stations located on the following lakes: Little Turtle Lake, Rainy Lake, Abitibi Lake, Elbow Lake, Baril Lake, Kashabowie Lake, Shebandoway Lake, Arrow Lake, Little Long Lake, Windigo Lake, Whitefish Lake, Reddick Lake, Manitowish Lake, Pelican Lake, Lake Nelen.

This is another step towards keeping the lakes in Northern Ontario well stocked with fish as it is the practice for the Government to arrange for the distribution of this fish fry every spring from its hatcheries at Port Arthur.

Trade Within British Empire  
Premier H. N. Harwell, of South Australia, who has been in England some time, spoke at Liverpool and urged the keeping of trade within the British Empire. To this end a distinct agreement would be necessary, he said.

Premier Harwell advocated the holding of a conference of empire-wide character of chambers of commerce and suggested that a conference of experts would be better than a conference of premiers.

Purely Inspirational  
The archbishop had preached a fine sermon on the beauties of married life. Two old Irish women coming out from church were heard commenting upon his address.

"It is a fine sermon his reverence would be after givin' up," said Bridget.

"It is indeed," replied Maggie, "and I wish I knew as little about the matter as he does."

## Prizes for Milling Seed

Results of Seed Tests at Saskatchewan Seed Fair

An exhibit of Marquis wheat won for A. B. Dowling, Luseland, Sask., first place in the baking and milling test of seed at the Saskatchewan seed fair held a short time ago. In the prize winning field this exhibit ranked second and took third place in the open class.

J. Adams, who took second place in the milling test, was third in the prize-winning fields and fifth in the open. Third in the milling test went to W. F. Warren, Bellevue, who was fourth in the prize-winning fields and seventh in the open.

The winner of the championship wheat at the seed fair was G. S. Canfield, but his sample was given seventh place in the baking and milling tests.

From the seventh place the following is the order of the contestants in the baking and milling tests: J. M. Lees, Moose Jaw, Marquis; W. Morley, Kesteven, Red Fife; O. S. Canfield, Wild Rose, Marquis; W. Rutherford, Lloydminster, Marquis; Searge Wheeler, Rosthern, Marquis; F. W. Canfield, Wild Rose, Ruby; F. W. Canfield, Wild Rose, Marquis; A. McKenzie, Moose Jaw, Ruby; S. H. Jones, Blaine Lake, Ruby; J. W. Broatch, Moose Jaw, Ruby; T. A. A. Wright, Lloydminster, Red Fife; J. R. Ellett, Lankin, Red Fife; B. Nicholson, Henriburg, Ruby; Walter Tait, Meota, Ruby; E. Matheson, Tuxford, Marquis; H. B. Ferguson, Sarnia, Marquis; G. S. Canfield, Wild Rose, Red Fife; F. W. Canfield, Wild Rose, Red Fife; A. B. Dowling, Luseland, Ruby; G. S. Canfield, Wild Rose, Red Fife; N. Judas, Red Fife; J. W. Broatch, Moose Jaw, White Winter.

"The samples submitted for the Saskatchewan seed fair," said the judges, "are very close in order of merit, and it is extremely difficult to judge the difference between the leading samples are almost incapable of determination, but taking the valuation from the baking and milling tests we have arrived at the foregoing results."

## Income Tax on Aliens

Would Affect Non-Residents Employed in Country or Deriving Income From Country

The House of Commons adopted a resolution calling upon the government to consider the advisability of levying an income tax of eight per cent. on all aliens, not being residents of Canada, who are employed in Canada or derive income for services rendered in Canada, when such income exceeds \$1,000 per annum. The resolution was proposed by W. M. Berman (Liberal, Welland) who stated that, up to November, 1921, the Income Tax Act of the United States was practically the same as that of Canada. In 1921, the United States act had been amended in such a way as to bear heavily upon Canadians who derived their income from work in the United States. The result was that Canadians, living in Canada, but working in the United States, and whether married or single, were not allowed an exemption of \$1,000 and were taxed at the rate of eight per cent. At the same time the Canadian tax on an American citizen was only four per cent., with an exemption of \$2,000 for married men or men with dependents. The Canadian taxation law treated both Canadians and Americans exactly the same. The United States act worked an injustice on Canadian citizens working in that country, while at the same time an equal number of Americans were working in Canada and living in the United States.

## Playthings for German Children

Latest Toy Shell-Scarred French Village Made of Cardboard

Surrounded by his comrades in the lobby of the Chamber of Deputies at Paris, General de Castelnau gravely took from a red box a number of little cardboard houses which he set up upon the lid. The toys had been received by the General from one of his former officers, now in Germany, and they represented the latest invention in toys for German children. The houses could be taken to pieces and folded flat and then set up again. But their chief peculiarity was that they had no roofs and were blackened and shell-scarred. With the half-a-dozen houses was a church with the tower practically demolished and one end in ruins. Two dead and broken trees completed the picture.

Thoughtfully provided with this miniature French village was a cannon and three German soldiers, two of which, in order to make them more realistic, lacked an arm.

Jane—Why do you call your dog a watch dog?  
George—Because when he jumps you see his hair spring.

## COOPERATE TO PREVENT DAMAGE FROM SAWFLIES.

Where wheat stems fell over last summer just before harvest the chances are the sawfly got in its deadly work. Usually the infestation is heaviest along the edge of the field.

If the damage was at all severe in 1921, on certain cropped lands, take all possible precautions on these areas this spring.

NEIGHBORS SHOULD COOPERATE or satisfactory results are impossible.

## METHODS OF CONTROL.

THE SAWFLY DEPOSITING AN EGG.

1-PLow DEEP between harvest and the end of May the following year all stubble land infested. Use a MOULD-BOARD plow fitted with a JOINTER so that stubble is all turned well down. Plow at least SIX INCHES deep.

2-USE IMMUNE CROPS. Oats and flax are entirely free from sawfly damage. Barley and winter rye are affected very little. Kubanka wheat suffers some loss but not so much as other spring wheats or spring rye.

## Grading of Hogs

Inducements to Farmers to Supply Hogs of the Bacon Type

The maintenance of Canada's export bacon trade will depend to a great extent on an adequate supply of hogs of the right type for conversion into first quality bacon. As an inducement to farmers to breed and feed that type a premium will be paid for hogs that grade as "select." The grading of hogs is expected to commence at an early date in accordance with the standards recommended at the recent conference of producers, packers, and Dominion and provincial departmental officials, held in Ottawa under the auspices of the Dominion Department of Agriculture. Official graders will be stationed at stockyards, abattoirs and other points where necessary, and a minimum premium of 10 per cent. will be paid by the packers for hogs suitable for the production of select bacon. The difference in price between the grades of live hogs, other than "Select Bacon" and "Thick Smooth" hogs, will be determined by supply and demand. The "Select Bacon" and "Thick Smooth" standards adopted were as follows:

Select Bacon hogs—Jowl and shoulder light and smooth; back from neck to tail evenly dressed; side long, medium depth, dropping straight from hock, ham full, good general finish, no excess fat; weight 160 to 210 lbs.

Thick smooth hogs—Not conforming to Withshire standard, but of smooth finishing and finish; weight 160 to 210 lbs.

The grading will be carried on under the direction of the Livestock Branch of the Department by competent officers appointed for the purpose.

## Highest Town in World

Phari, Tibet, Also Has Reputation of Being Dirtiest

The most lofty located town in the world is Phari, in Tibet, which stands 14,800 feet above sea level. In addition to being the highest town, it is also reputed to be the dirtiest. Its principal building is the ruined fort which occupies its highest point, and this, with its surrounding walls, gives it the appearance of a citadel. The streets of Phari are scarcely more than dirty gutters, and its basars—usually the pride of Oriental cities—is merely a few starved-looking stalls. The dwellings are principally peat hovels. The climate of Phari is one of intense cold, and it is more difficult to bear by the famous Tibetan winds which rise with perfect regularity every evening about 7 o'clock. The inhabitants live in indescribable squalor.

## Years of Discretion

"I asked you to send me young lettuce."

"Yes, ma'am. Wasn't it young you got?"

"Young? It's almost old enough to wash and dress itself."

In England the rolling-chairs used by invalids and others have to carry a motor license.

## Kitchen Gardens in West

Prairie Provinces Grow Every Vegetable in Common Use

The vegetables grown in the prairie provinces today include practically every variety in common household use—cauliflowers, carrots, celery, corn, cabbages, cucumbers, lettuce, onions, parsley, parsnips, potatoes, radishes, rhubarb, spinach, squash, turnips and tomatoes. The increasing acreage devoted to corn on the prairies has been a significant feature of agriculture in recent years, and this has now become a staple fodder crop to be found on most farms. Last year one of the Dominion statisticians has to be shelved out of the glass houses because of an excessive production. In the same year the three prairie provinces produced for commercial purposes 12,907,000 bushels of potatoes, one of the Dominion production of \$16,618,000; 1,454,000 bushels of turnips and of 27,373,000, and 3,600,000 bushels of durum corn out of 40,129,000 in all Canada.

## Farmers May Use

Radio in Plowing

Expert Working on Scheme Which Will Soon be Completed  
Farmers will plow their fields by radio, if E. D. Glavin, radio fan, perfect his invention.

Glavin has succeeded in operating an automobile by wireless. Now he wants to make it possible for the farmer to sit comfortably at home while operating his tractor in the field.

"I've been working on the project since 1911," says Glavin. "But I haven't completed it yet."

"The idea is not to propel the machine by wireless, but to direct its course."

When an electric auto stops, its power is disconnected. Close the switch, completing the circuit, and the car will continue on its way.

"In my model I control this switch by radio."

Glavin's model is a small boatlike affair with a spiral aerial reaching vertically eight feet in the air.

"This is all right for demonstration purposes," he said, "but if it isn't much good as actually."

"We can't have chauffeurless autos running around in crowded streets. But we can have a wireless directed tractor operating on a flat field."

## Oil Drilling Started

That the coming season will see a great deal of activity in the way of drilling in the Peace Corps oil field is evidenced by the fact that several large companies have intimated their intentions of drilling this summer and there are several other companies waiting until the field is proven further. The first drill for the field this spring has been brought into Spirit River by the Community Drilling Company, a company formed of Edmonton interests.

It is often more satisfaction not to know things and have people think you do than to know things and have nobody believe it.

## New Method for Identifying Cattle

Taking Nose Prints May Do Away With Branding

The use of thumb or finger prints in identifying criminals is well known to everyone who has read popular detective stories. It has remained, it is claimed, for O. H. Baker, a member of the United States Jersey Cattle Club, to put a similar system into practical use for the identification of livestock.

With a piece of smoked glass Mr. Baker succeeded in taking impressions of the noses of several Jerseys and found that in no case was there any similarity in the arrangement of the nodules, lines and ridges which mark the nose of the cow. He later interested the Minnesota Agricultural College in his idea and considerable experimental work has been done since.

Advocates of this method point out that, if practical, it will eliminate the troublesome method of tattooing marks on animals and, likewise, will relieve the taster the difficulty each month of locating and reading the tattoo mark. For the non-colored breeds, such as Jerseys and Guernseys, such a method should be a very great boon. Likewise, for Holsteins and Ayrshires it will be much simpler than making a set of complicated marks of color markings.

The material used at present to take these marks is a common inkling pad smeared with printer's ink, which is applied to the cow's nose after being thoroughly dried. A piece of unglazed paper is then pressed firmly against the nose when an impression clear enough for identification purposes is secured.

## World-Crop Prospects

Favorable Outlook for Crop for Whole of British Empire

Favorable outlook for the wheat crop in the British Empire as a whole is indicated in latest United States Department of Agriculture reports on world crop prospects. Winter wheat showings for the leading wheat countries, including Canada and British India, are slightly higher or one and three-tenths per cent. better than last year.

Reports on wheat are favorable from Australia and British India. The department expects fairly complete data this month on condition of Canadian grains.

## Will Manufacture Starch in B.C.

The Pacific Starch Products, Ltd., will build a plant for the manufacture of starch, glucose and dextrine in South Westminster at a cost of \$40,000. They expect to use 7,000 tons of potatoes each year, buying culls from the Fraser Valley farmers, which have formerly been fed to cattle. Only farmers having stock in the company will be allowed to supply potatoes.

Both in the Swim

"My daughter sprang from a line of peers," said the bride's father.

"Well," said her father, "I jumped out of a duck once myself."—The Naval Monthly.

## Vegetables For Health

Every Farm Should Have a Kitchen Garden

The shortage of help on many farms has led to the abandonment, or nearly so, of the kitchen garden and the growing of vegetables under field conditions. Such crops as lettuce, radishes, onions, garden carrots and beets, require to be grown close to the house as it is so easily accessible when needed. But such crops as the cabbage, cauliflower, winter beets, corn, celery, parsnips, beans and peas may just as well be grown under field conditions. A small acre of land will grow all of the former class that even a large family can use. It is well, therefore, to make thorough preparation of the soil, to select carefully the varieties to be sown, and to give the needed cultivation during the season. Such perennial plants as asparagus and rhubarb require permanent quarters.

The Experimental Farms have made a careful study of varieties both from the standpoint of quantity and quality of crop. The following varieties, while not definitely claimed to be superior to all others, are recommended as safe to plant:—

Beets—Detroit Dark Red, Crosby Egyptian and Detroit Half Long Black Blood.

Carrots—Oxheart and Chantenay.

Peas—Alaska, Early Star, English Wonder, American Wonder, Thomas Laxton, Gradus are all early sorts of the wrinkled type. Among the late varieties are Stratagem and Telephone.

Tomatoes—Donny Best, Chalks Early Jewel and Earlsdon.

Beans—Round Pod Kidney Wax, Wardwell Kidney Wax, Hodson Wax, Stringless Green Pod, and Pencil Pod. Cabbage—Early Jersey Wakefield, Copenhagen Market, Danish Ballhead, Houder, Paris Market.

Cauliflower—Early Dwarf Erfurt, Early Snowball.

Celery—Golden Self Blanching (early), French Success, Perfection, Hartwell, Triumph, Wintergreen (late varieties).

Corn—Early Malcom, Early Fordhook, Early Cory, Crosby Early, Goldens, Dantam, Early Evergreen, Black Mexican, Stole Evergreen, Country Gentleman.

Lettuce—Grand Rapids, Black Seed-Simpleminded, Iceberg, Crisp as Ice, Improved Salamander.

Onions—Yellow Globe Danvers, Large Red Weatherfield, Prize Taker, Squash—White Bush Scalloped, Long White Bush, Summer Crookneck, Delicious, Hubbard.

## Bank of England's "Great Balance"

Machine for Testing Light Gold Coins Very Accurate

In the bullion room of the Bank of England in London stands the "great balance."

It is a machine that was constructed originally for testing light gold coins.

Standing approximately seven feet high and weighing nearly two tons, this wonderful piece of mechanism can weigh a piece of half-sovereign or a 400 pound gold bar with equal accuracy.

Before it can be used it must always be carefully dusted, for otherwise the dust that has settled upon it, even in the course of a few minutes, would be liable to the naked eye would cause it to register inaccurately. So responsive is the machinery that a postage stamp placed on one of the two weighing portions moves the index six inches.

When the new English currency notes were issued the great balance was kept busy virtually day and night weighing the gold coinage that was called in and replaced by notes. It has now been found that the total loss of gold, owing to the abrasion of the coins as they passed from hand to hand in the course of circulation, amounts to nearly \$5,000,000.

That, however, is not the loss so alarming as it sounds, for the loss is spread over a period of twenty-five years. Twenty-five years is reckoned in England to be the legal "life" of a sovereign at its full face weight.

Compensation for Destroyed Animals  
Scaling down of the amount of compensation paid for animals destroyed for tuberculosis in the health of animals legislation, is provided for in a bill which has been placed on the order paper of the Commons by the Minister of Agriculture, Hon. W. R. Matherwell.

Provisions to cover the grading of vegetables and particularly potatoes and onions, will also be laid down in a bill which is to be brought before the Commons.

## Western Crop Acreage

The total acreage prepared for seed in the three prairie provinces is reported to be 28.3 per cent. greater than that of last year, with a total of 16,469,548 acres.

## Weekly Provincial News Bulletin

Issued by the Publicity Commissioner,  
Government Buildings, Edmonton.

### Natural Resources—

Premier Greenfield and Attorney-General Brownlee returned during the past week from Ottawa, where they have been negotiating with the Federal Government in connection with the return of the Natural Resources to the province. The Premier will issue an official statement shortly on the progress made in the negotiations and the lines along which Alberta is proceeding.

The fourth annual convention of the Young Farm People will be held at the University, Edmonton, between June 1 and 13. Young people of the farm from the ages of 16 to 26, are invited to attend this convention, where lectures of interest will be given.

Two-thirds of the excavation work on the Lethbridge Northern Irrigation ditch has been completed. About 1400 men and 800 teams are now at work along the whole project rushing it to completion.

### Road Work—

A large program of road work is being planned now by the Public Works Department, following a trip of 900 miles taken by Mr. Alex. Ross and Deputy Minister J. D. Robertson, for purpose of inspection. Attention is to be given largely to market roads, and to extension and repair of trunk roads where urgent.

Plans are now being prepared for a new unit to the mental hospital at Ponoka. The new unit will be uniform in style and character with the other units, and will provide additional accommodation at the hospital for about 200 patients.

A very heavy traffic is being experienced over the A. & G. W., the government road leading to the north land. Passengers include geological parties and other parties going north to spend the summer in work in the far north.

Four pure-bred race horse stallions and five mares have recently been shipped by the Prince of Wales from England to his ranch at Beddles, near High River, which he bought when he visited Canada in the summer of 1919. One of these was purchased in England for \$55,000.

### New Districts for Health Nurses—

Arrangements are practically completed now for the most comprehensive program of lectures, clinics and demonstration work yet undertaken by the public health department in the province. As has been announced previously, additional public health

nurses are being placed in the field this summer. New districts in which these public health nurses will be employed are Chipewyan, Provost, St. Paul de Metis, Lesser Slave Lake, and the Beaulieu settlements north of Vermilion, where a public health nurse with knowledge of the Beaulieu language is to be placed. The duties of these public health nurses comprise chiefly inspection of school children, home visiting, and lecturing where possible, and general assistance to the health authorities in conducting an educational campaign in health habits.

Literaries are now being arranged for lecturing nurses. Miss Crosby is now in the Athabasca district, and on her return will work in the districts west of Edmonton, lecturing on health matters. Miss Conroy will commence on May 15th, a tour of the G. T. P. line east of Edmonton to the boundary, working back by way of the Provost line of the C.P.R. Miss Emmerson is working south along the C. & E. line. Miss Morkin is to lecture in the Killam, Strath, Invermay, Round Hill and Oxbow districts.

A series of lectures and clinics will also be held on the Youngstown line at various points between Munson and Atsica. Taber district has asked for clinical work, which may be arranged later in the season. There is also a request for clinical work from Ibstone district.

The work of the public health nurse, as has been stated, is chiefly educational. At points where it can be arranged, child welfare clinics are held. These are for examination of babies and children of pre-school age. When services of a doctor are available, a complete physical examination is given each child. If a doctor is not available, the nurse weighs and measures the children, and gives instruction in infant feeding and dieting. Where lectures and demonstrations are held, lectures on communicable diseases and other health subjects are given, and demonstrations are held in home nursing.

### Summer School for Teachers—

Plans are now practically complete for the summer school for teachers to be held at the University at Edmonton from July 3rd to August 12, under the auspices of the department of education. Transportation costs will be refunded to teachers under the usual conditions. Courses to be given include Elementary Science, High School Science, Household Economics, Industrial Arts, and Art Primary Work, Physical Education, Music, courses for British and American teachers, courses for first class certificates, courses for academic certificates, special courses, university subjects leading to B.A. or B.Sc. degree. Courses will be based on the new elementary school curriculum.

## THE CASE FOR THE LEAGUE OF NATIONS

The following article was written for the Free Bulletin by George Goodwin, a well-known journalist and barrister, of London, England, who is London correspondent for a number of leading Canadian papers:

The destiny of every man, woman and child, and of the numberless generations as yet unborn, will be determined by the success or failure of the League of Nations. Out of the travail of the Great War; out of the world's agony; has come a great ideal. It is not a new ideal; it was advocated two thousand years ago; but it is no longer something to dream upon as a thing desirable but beyond the reach of human aspirations. It has become a necessity without which the race of man must surely perish from the face of this planet.

It needed the bloodiest war in history to bring this truth home to the minds of men. It needed that desperate instinct of self-preservation in whose name countless wars have been waged in the past, to warn us that unless we wipe out force as the final sanction, force will surely wipe out our race.

It was out of a world weakened by war and cursed by cynicism that the Great Hope was lighted in the hearts of men. And those who had suffered most, the women who bore the men and boys who died, took heart, of grace believing their sacrifice had not been in vain. Today, the world stands at the cross roads and it is for each and every one of us to turn according to the dictates of heart and brain; a portentous decision.

### Right or Might?

At the outset of the League it is faced with manifold difficulties. The world, heretofore an armed camp, has to adjust itself to a new conception of international relations based on what might be termed wider patriotism. Differing among themselves in religion, language and customs, and a thousand and one minor matters the nations of the League will, with out doubt, discover that co-operation for peace in place of rivalry for war is not without difficulties. The limitations are those of character, not of circumstances, as has been made abundantly apparent at Washington where in the most unexpected quarter demands have been made for unobtainable armaments. Militarism is not a passion peculiar to any one nation; the root of it is in them all. Not the least menace the League has to face is an outbreak within its own constitution. But these difficulties, when the calamity of failure is contemplated, are seen in their true proportion. However insuperable they appear they have to be overcome. They have always been difficulties. They are there to be overcome; given the essential good will, they will yield to time and hard work.

Those who oppose the League, do so on several grounds; there are those who seek to kill it with ridicule, the indifferent, and those who regard it as a chimera. It will be necessary to silence the first, intrigue the second, convert the last.

### Three Questions

Many problems face the League, problems more gigantic than have ever in the past faced nations. But the League has the resources of the civilized world at its disposal: it has the pick of the best brains; it has the support of all thoughtful men who desire to see the end of war.

### How does the League work?

What has it accomplished in the short period that has passed since its inception?

How will it enforce its decrees in the face of a nation in arms? In other words, what are sanctions?

### How the League Works

The League of Nations is a Society of Nations acting together for the promotion of international co-operation, peace and security. It is pledged not to resort to war; to maintain justice and scrupulous respect for all treaty obligations; to deal only in the open; and to establish understandings

of international law as the actual rule between Governments.

The League is governed by the Covenant. The Executive consists of representatives of the principal allies and associated powers, together with representatives of four other nations of the League, and a Secretariat.

### The Covenant

The range of subjects covered by the Articles of the Covenant of the League is wide. It aims at the reduction of national armaments to its lowest point. It proposes to forbid the manufacture of war material for private profit. It appoints a permanent Military Commission to advise where military action becomes necessary. It declares that any war or threat of war, is a matter for the League. It imposes upon its members the obligation of referring all international disputes to arbitration, and in the case of those nations without the League, invites them to submit themselves in the same way. It provides for the isolation of such states by severance of trade, financial and personal intercourse, in the event of a declaration of war. In other words, any State declaring war upon one member of the League is, ipso facto, at war with the whole League.

It sets up a permanent Court of International Justice, such Court being competent to hear and determine any dispute of international character which the parties thereto submit to it. It provides for the registration of all treaties, thus doing away with the evil of war-breeding secret obligations and pacts of the past. It pledges itself to protect those small peoples who have been liberated by the war from their former sovereignty, yet who are still too weak to fend for themselves.

It extends its beneficial activity into the realms of social well-being and undertakes to maintain fair and humane conditions of labor for men, women and children; to supervise the execution of agreements with regard to traffic in opium and dangerous drugs; to take over the trade in arms and war material. It undertakes, further, to maintain free intercourse, communication and transit and amicable treatment for commerce.

To the Covenant there are forty-eight signatures, representing as many Powers and three-quarters of the world's total population. What Has Been Done? Here, very briefly, are set forth a few of the things so far accomplished by the League of Nations.

It has stopped a war between Sweden and Finland. It has arrested hostilities between Poland and Lithuania. It has registered and published sixty-nine treaties. It has set up the Court of International Justice. It has set up an International Health Office.

It has repatriated 200,000,000 prisoners of war, who otherwise would have perished last winter.

It has taken the first steps towards standardizing labor throughout the world.

It has held a successful financial conference in Brussels.

It has created a Permanent Armaments Commission.

It has organized a campaign against typhus in Eastern Europe.

It has established a Permanent International Labor Organization and held a successful conference.

From this brief summary it will be seen that the League is a fact, and no longer a theory.

What are the Sanctions? How can the Leagues enforce it will? What are its sanctions?

At the present time, with the memory of the horror of war fresh in the minds of men, the question of sanctions is not so urgent as it may be to a new generation untutored by that fierce ordeal. But since it is possible that national ambition may again assert itself and become a menace to the peace of the world—and there are indications that this is

more likely to happen in our own day than would have been thought possible six months ago—the question of sanctions is a very important one.

Many critics of the League regard it as impotent without a large military machine at its disposal. That is a fallacy, unless its ultimate appeal be to force. An international army such as has been suggested has many difficulties; there is the question of language, equipment, training and organization, all subjects likely to be fruitful of contention. Perhaps such an army is not necessary at all.

The Covenant of the League itself provides an effective sanction. By Articles XVI and XVII, any State that resorts to war in disregard of the Covenant, refusing arbitration, is ipso facto, at war with the other parties to the League.

The Economic Weapon. The drastic effects of virtual excommunication that is provided for, would be, in effect, an appeal to force; force of a passive kind, true; but none the less terrible in its consequences than actual war in the field.

The Great War has demonstrated the fact that no State can stand alone in war. A blockade by the League would be a measure far more terrible in its effectiveness than our blockade of Central Europe. And the writer, just returned from a journey through Germany and Austria, saw abundant evidence, in the form of rickety and unbecomingly children, of what that blockade meant to the Central Powers.

A blockade by the League would result in a bloodless war against the weak; for the first to suffer would be the women and children and the old; only the lusty would survive such privation.

Everybody has a back bone with his head at one end, and at the other—a place to sit down. Some guys use one end most—

Some use the other. Anybody can talk till one end of the guy uses by his pay check—heads he wins, tails he loses.

vation. No State would lightly expose its citizens to such suffering and defeat as would be the inevitable end of such warfare.

Here, then, is the sanction by which under its present constitution, the League of Nations would seek to enforce obedience in the interests of Peace.

The creation of an international police, a sort of Foreign Legion, would have few of the dangers and difficulties of an international army; it would be too small to become the centre of intrigue. Moreover, the experiment is not new; there was Garibaldi's Ten Thousand; there is the Foreign Legion.

But the great weapon, the most effective, most terrible instrument in the hands of the nations of the League, is the Economic Weapon.

### The Hope of the World

The League of Nations is an imperfect instrument; it has obvious limitations; it faces difficulties innumerable. It is a fragile machine, for so stupendous a task as the abolition of war from the face of the earth. It can only succeed if it has behind it the moral support of the people of the world; the peoples who suffer from war, who have nothing to gain by it.

Right or Might? World Peace or Downfall?

A thousand new horrors of scientific frightfulness by land, sea and air to inevitable annihilation; or a world at peace under the reign of Right?

That is the choice; for if the League of Nations fails what is our hope? Yet, for its success a change of heart is necessary that will make possible the "Brotherhood of Man; the Federation of the World,"

## How's Business?

Advertising, backed up by the right spirit, the right goods and the right service, can rescue a sinking business and will make a prosperous business more masterful in its own community.

When John Wannamaker, the Prince of Merchants, began business, he resolved to force matters. He was not content to WAIT to be found out—he DETERMINED TO BE found out. In short, he advertised. He threw on his business, as small as it was, the light of publicity, and the public of Philadelphia entered the shop, on which the light shone.

In this community the public is entering those shops on which the light of advertising is falling.

### A WORD TO THE PUBLIC

Be sure of this: those who are using our columns week after week do not give you poorer goods or service or have higher prices.

Shops which are illuminated by advertising court with full confidence your favor.

Shop Where You Are Invited to Shop

### LITTLE TALKS TO LOCAL BUSINESSMEN

Noah was the first advertiser on record. He advertised that the good ship "Ark" would sail on a certain date on an indefinite voyage and that those who wished to prolong their existence would be advised to book passages.

The advertising was not altogether successful. It was not believed by all. Noah, however, sailed on schedule time with a good cargo of animals, but his human passengers were mostly all relatives and probably dead heads.

Since Noah's time, many a good thing has been advertised, and on various occasions the so-called wise ones have scoffed and disbelieved in their own undoing.

The readers of The Enterprise are not antediluvians. They read the ads, and if your message contains something of benefit to them, they will deal with you.

If you are one of the "business" men who do not advertise, you had better start now before the flood comes and you go under.

## MARY UP TO DATE

Mary had a little lamb,  
That day had passed away  
No lamb could follow at the pace  
That Mary sets today.

Now, Mary sits at motor wheel,  
With skirts too short by half;  
No lamb's stays by any flight  
But you can see her calf.

It's as hard to keep a loafer on the  
top as to keep a good man down.

Blairmore Lodge, No. 66, meets every Tuesday night at 8 p.m., in the Oddfellows' hall. Officers for the ensuing term: J. Patterson, N.G.; W. T. Patterson, V.G.; M. B. Hoffman, R.S.; J. B. Harmer, P.S.; J. Montalbet, Treasurer.

Crows' Nest Encampment No. 6, meets on the second and fourth Wednesdays of the month in the I.O.O.F. hall at 8 p.m. Officers for ensuing term: J. Patterson, C.P.; W. T. Patterson, S.W.; A. Mowsey, F.W.; Wm. Patterson, Scribe; J. Montalbet, Treasurer.

Crowview Rebekah Lodge, No. 66, meets the first and third Thursdays of the month at 8 p.m. Officers: Sister Patterson, N.G.; Sister Fraser, V.G.; Sister Evans, R.S.; Sister Walker, P.S.; Sister Pinkney, Treasurer.

Bellevue Lodge No. 118, meets every Monday night at 8 p.m. Officers: F. Puletti, N.G.; H. Jepson, V.G.; H. Barlas, R.S.; J. Wyatt, Treasurer.

Armistice Encampment No. 17, Bellevue, meets the first and third Wednesdays of the month. Officers: A. B. Carr, C.P.; Stephen Berry, H. P. Harry, Jenson, S.W.; Fred East, F.W.; E. F. Coffin, Treasurer; Charles W. Ray, Scribe, Box 6.

Ray of Hope Rebekah Lodge No. 67, meets the first and third Wednesdays of the month. Officers: Sister Christie, N.G.; Sister Barlas, V.G.; Sister F. Hallworth, R.S.; Sister Libeland, P.S.; Sister Goodwin, Treasurer.

Visitors of the Order are cordially invited to attend the above lodges.

Several residences are in course of erection in West Coleman.

Nearly everything is physical culture these days except work.

About eighty-five per cent of the people of India are engaged in agriculture.

The warm weather of the past few days has had the effect of raising the streams.

Valuable and extensive silver deposits have been discovered on the south coast of Newfoundland.

Inspector McDonald, of the K. C. M. Police, was up from Macleod the early part of the week.

Sweden has harnessed more than 1,000,000 horsepower of its waterfalls, which constitutes 18 per cent of what is available.

The town of Coleman has a gang of men and teams engaged repairing and grading the streets in the town, particularly Main Street.

A slight mishap to the engine on Monday's West bound express caused a delay of a couple of hours at Burnham. A relief engine had to be called in from Crows' Nest.

D. K. Fleming has returned to his old job as drummer for the Western Canada Wholesale Co., after a few weeks in charge of one of the Triteer Wood stores in British Columbia.

H. E. Tustion, formerly of the Lunenburg C. P. R. staff, has been transferred to the Ponoka depot, and Mrs. Tustion and daughter Freda have already joined him there.

Pong King will be tried for the murder of three Chinamen at St. John's, Newfoundland. King is charged with shooting three of his fellow countrymen to death, as well as seriously wounding others. He also attempted suicide.

Again the blessed milk cow will roam the blooming street, and you and I will share her and various things repeat. She'll lie down on the sidewalk and calmly chew her cud or walk its hard smooth surface and cover it with mud (?) The lawns and flowers will help her grow a coat as fine as silk; the garden sows will make her give a dandy mess of milk.

## Forest Fires and the Citizen

Forest fires have made such inroads upon Canada's forests that no citizen having the country's interests at heart can refrain from adopting every sensible precaution in his personal conduct. Unextinguished camp fires, lighted matches, and tobacco have robbed the nation of millions of dollars in public-owned property. To leave a camp-fire burning while in or near standing timber is a plain invitation to a disaster. The lighted match and the cigarette are in the same category.

## Town Act Amendments

Following are notes on the amendments to the town act passed by the 1922 session of the legislature. The auditor's report for the period ending October 31 has been submitted and one report only of the year's transactions ending with December 31 has to be prepared by the 20th day of January. This statement is read at the taxpayers' meeting to be held on the last Friday in January, and nominations will be held on the first Monday in February and elections on the second Monday, the new council taking office on the third Monday in February.

The preparation of the voters' list for the town will now be done on or before the tenth day of January, instead of the first day of September, and the proceedings with regard to the placing of names on the voters' list following immediately after the tenth day of January up to the twentieth day of January.

How many people fulfil the Scriptures by loving their neighbor as themselves?

White zinc is produced by a process of heating zinc ores with coal.

To relieve farm labor shortage in Saskatchewan, laborers are being brought in from Holland.

The regular fortnightly meeting of the town council takes place on Monday night next.

George F. Weir, mayor of Trail, B. C., died rather suddenly on Thursday of last week.

Mrs. Thomas Harrison, whose husband died recently at Seattle, is visiting with relatives here.

Smoking tents, for the convenience of ladies, will be established along the bounds of the golf course.

A large number of local people, including sports enthusiasts, journeyed to Michel and Fernie on Sunday to witness the baseball games.

A dance will be given in the Union hall at Hillcrest on tomorrow (Friday) night, under the auspices of the Hillcrest First Aid.

Wo Chong, formerly connected with the Club Cafe at Blairmore, has entered action for damages against Liang Meng, Choo Yoo Hui, Lung Get and A. K. MacDonald. This case arises out of the winding up of insolvent affairs of the former cafe proprietors.

Quite a number of auto parties from California passed through here the early part of the week, bound to destinations in Alberta and Saskatchewan. Some of them carried all space filled with California new fruits.

That treatment and assimilation of foreign-born settlers was a national problem and not one confined to the provinces, was the statement made to the members of the Ottawa Canadian Club by Dr. J. M. Anderson of Regina, who has spent some 15 years among the new settlers in Saskatchewan.

A large percentage of wholesale commercial travellers are today competitors of the local retail merchants. The town has a by-law requiring a license for such businesses and it should be made effective. The traveller solicits orders from the local merchant, then sells the same goods at the same price to the merchant's customer. The traveller probably pays for a meal in town, while the local merchant pays rent or heavy taxes for the up keep and very existence of the community.

## In The District Court of The District of Macleod

In the matter of the Estate of Albert Yagos, late of the Village of Coleman, in the Province of Alberta, Miner, Deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named Albert Yagos, who died on the 28th day of March, A. D. 1922, are required to file with Albert Yagos at Coleman, in the Province of Alberta, by the 8th day of July, A. D. 1922, a full statement duly verified of their claims or of any security held by them, and after that date the Administrator will distribute the assets of the deceased amongst the parties entitled thereto, having regard only to the claims to which notice has been so filed or of which notice has been brought to his knowledge. DATED at Lethbridge, in the Province of Alberta, this 16th day of May, A. D. 1922. OSTLUND & BROWN, Lethbridge, Alberta. Solicitors for the Administrator. —may16-3

## Says That Canada Will Lead United States As A Wheat Producer

Canada soon will lead the United States in the production of wheat, declared Senator Calder, of New York, in addressing the Senate in opposition to the St. Lawrence waterway project. He expressed the opinion that the proposed canal was ostensibly for the purpose of carrying Canadian wheat, and pointed out that Herbert Hoover had stated that the United States would become a wheat-importing nation within ten years. In presenting an interesting picture of the possibilities of Canada as a wheat growing country, the senator said the Dominion would develop several times the wheat acreage of the United States. "The peak wheat acreage in the United States," said Senator Calder, "was 75,694,000 acres, reached in 1919, an increase of 35 per cent. over the acreage in 1910. Canada's peak was 19,125,968 acres in the same year, an increase of 115 per cent. over the 1910 figure. Canada's wheat production increased from 132,000,000 bushels in 1910 to 262,000,000 bushels in 1920, an increase of 100 per cent. The production of the United States increased from 625,000,000 in 1910 to 825,000,000 in 1920, an increase of approximately 33 per cent. While production in the United States increased 33 per cent. during the 1910 period, the value of the crop increased 100 per cent. the 1910 value being \$569,000,000, the 1920 figure being \$1,197,000,000. During the same period the value of Canada's crop increased 400 per cent. being \$99,530,000 in 1910 and \$1,737,350,000 in 1920. "The average price per acre of the land devoted to wheat in 1920 was \$92. The average price of Canadian land now devoted to the production of wheat is \$43."

Senator Calder then read statistics showing details of the relative increase in Canadian and United States wheat growing lands.

"But this is only part of the picture," the New York Senator continued. "Canada has but entered the lists. Its wheat growers have not even begun to fight. There are in Manitoba, Saskatchewan and Alberta 120,594,000 acres under private ownership. The total number of acres surveyed up to January 1, 1920, was 199,757,000. Of this total approximately 2,000,000 acres are now available for homestead entry. In addition to the surveyed areas there are large tracts in these provinces which have been only partly surveyed. These tracts contain more than 250,000,000 acres."

"A quarter section of land may be obtained as a homestead in these provinces on the payment of an entry fee of \$10. In Northern Ontario a quarter section can be obtained for 60 cents an acre, one-quarter in cash. "Now, here is the question: Granted equal transportation facilities, what will be the result of a contest in which 250,000,000 acres of land, valued at 10 cents to \$43 an acre, is pitted against 75,000,000 acres of land with an average value of \$92 an acre?"

"Bear in mind that the proposed canal is ostensibly being built primarily to carry wheat. Divorce the project from its aggressive agricultural support and it collapses. I concede that perhaps this canal, if built, may carry wheat, but whose wheat? I ask you. The answer is unambiguous—Canada's."

"I will not venture an attempt to prophesy regarding the future of the United States as a wheat exporting nation. Herbert Hoover has given it as his opinion that within 10 years we will have become a wheat importing nation. I neither reject nor accept that conclusion. But I know of no one better qualified to speak on this subject than our able secretary of commerce."

### Reports Gain in Population

Newfoundland Shows Population Increase While Labrador Is Going Back

Newfoundland and its dependency, Labrador, has a population of 262,535, according to the figures for the recent census just issued. In 1911, the population was 242,619. The increase on the island, the number of people living in Labrador having shown a considerable decrease. Denominational population is divided as follows: Roman Catholics, 84,475; Church of England, 84,493; Methodists, 14,234; Salvation Army, 13,051. All other denominations show increase of 12,946; the Anglicans, 5,882; and the Roman Catholics, 5,301.

The largest insect known, but now extinct, was a dragon fly, which had a wingspread measuring two feet.

W. N. U. 1419

### Poultry Performance Record

Improvement Shown in Egg-Laying and in Number of Entries  
That the record of performance in egg-laying established by the Poultry Division of the Dominion Livestock Branch, is appreciated is indicated by the increase both of breeders and entries for 1920-21 compared with the number entered in 1919-20. In the latter year the entries were 47 breeders and 4,436 birds and in the former 81 breeders and 7,511 birds. Quebec shows, according to the second report just issued, the largest increase in the number of breeders, and Ontario and British Columbia show the greatest increase in birds entered. The report indicates that the breeds most favored by British Columbia are Leghorns and Wyandottes, and by Ontario, Leghorns, Plymouth Rocks and Wyandottes. Quebec's fancy is for Plymouth Rocks and Rhode Island Reds. New Brunswick, Prince Edward Island and Saskatchewan also favor Plymouth Rocks. British Columbia stands well ahead in the number of birds qualified for the record. On the coming second, Quebec third, and Saskatchewan fourth. Considerable improvement in this respect is shown in the second year compared with the first.

Certificates are issued for all qualified birds laying no fewer than 150 eggs in 52 consecutive weeks, with advanced certificates for birds that lay over 225 eggs in the same period, providing the quality of the eggs is not below that of the grade specified in the Canadian standard for eggs and that they average at least two ounces in weight. British Columbia again shows to advantage in the advanced qualifications, with Ontario and Quebec following. With New Brunswick fourth, and Saskatchewan and Prince Edward Island, tying. In British Columbia, 96 Single Comb White Leghorns granted advanced certificates, averaged 338.32 eggs per bird in the 52 weeks; 42 Wyandottes, 240.17 per bird; and 25 Barred Plymouth Rocks, 241.17 per bird. In Ontario 44 advanced Leghorns laid an average of 245 eggs per bird in the 52 weeks, 27 Plymouth Rocks 234.16 per bird, and 18 Wyandottes 235.13 per bird. In Quebec 10 advanced Plymouth Rocks averaged 235.2 eggs per bird, and 6 Rhode Island Reds 235.3 per bird.

### Mystery of the Lightning Bug's Light

Wireless Operator Says It Is Caused by Radio

The mystery of what makes the lightning bug light has been solved and the answer is radio. Hamilton Bailey, wireless operator on the Blackhawk, flagship of the North Atlantic wireless fleet during the war, declared recently.

Lightning bugs, Bailey said, are equipped with miniature audio bulbs and possess a low radio frequency, and a short wave length. Radio waves generated by parent lightning bugs equipped with broadcasting apparatus cause the lightning-like flashes, he asserted. Each bug is equipped with its own antenna, the long feelers or whiplashes, serving as the aerial, according to Bailey.

### New York Found in Switzerland

Little Alpine Hamlet Near Lucerne Has Fifty Inhabitants

A peasant handed in a telegram of 60 words at a branch telegraph office for his wife in New York and placed a franc on the counter for payment. The clerk asked whether the wire was really meant to be sent to New York, and proceeded to make the calculation. When the comparatively large sum required was announced to the peasant he protested loudly and insisted that New York was in Switzerland.

And so it was found to be, but it took long and patient search through a large ancient volume to discover that there is a New York in Switzerland, a little Alpine hamlet of 50 inhabitants not far from Lucerne.

**Etymological Bigness**  
"How d'yer like yer new boss name?" asked one stenographer of another on the elevated.

"Oh, he ain't so bad, only he's kind of bigoted."

"What yer mean, bigoted?"  
"He seems ter think dat words can only be spelled in his way."—Boston Transcript.

The yielding barrier installed at the junction of the St. Lawrence river at the Hackensack and Passaic Rivers at Jersey City will stop any speeding auto without injury to either auto or barrier.

### New Use for Wireless

Fixed Boundary Line Between Northern and Southern Australia. Wireless has just been put to a new use. It has been brought into service for fixing the frontier line between two States.

More than half a century ago the 129th meridian of east longitude was chosen as the boundary between Western Australia on the one hand and South Australia and the Northern Territory on the other.

This line, however, was never accurately laid down, and, as it ran through an apparently useless wilderness, nobody cared very much.

But when, not long ago, oil was discovered at the northern end of the line, it at once became important that the frontier should be accurately defined so that there might be no doubt as to which State had the right to the oil areas.

The State astronomers of Western Australia and South Australia started to fix the true border, and they set about the work with a field wireless plant.

From Lyons, France, and from Annapolis, in the United States, they received time signals, and after allowing the 25th part of a second for the transmission of the signals, the position of a point on the 129th meridian was worked out at each end of the boundary line, over a thousand miles apart.

The astronomer of South Australia, when asked how nearly accurate he thought the line had been fixed replied: "Well, we are within thirty yards of it. The concrete blocks at each end of the line are at most, certainly not more than thirty yards out."

Of the Scottish cities, Glasgow's population is now 1,334,068, an increase of 35,532 in 1911, while Edinburgh's stands at 420,267, a decrease of 2,779.

Argentina has 22 public holidays during the year, Germany 19, Italy 19, Rumania 24 and India 21.

### Flame Burns Under Water

Will Prove of Great Advantage in Salvage Work

A powerful flame that burns under water and can cut up steel plates, has been invented for salvage work. A demonstration of its power will be given, for the benefit of the British Admiralty and the big armament firms, in the Siebe German laboratory, where a huge tank is to be erected.

A steel plate three-quarters of an inch thick, had been neatly cut through at the rate of 20 inches a minute, under water. A hard steel file was similarly treated.

Under practical conditions the device has power to deal with an eight-inch section of steel bar in six minutes.

M. Eugene Royer, the inventor, has already shown its successful working in the Lyons dockyard, and naval attaches in this country are to watch the demonstration.

### Medals for Life Saving

President of France to Award Medals to Crew of Canadian Ship

The British Board of Trade has received eight silver medals and two bronze medals with diplomas which were awarded by President Millerand of France to certain members of the crew of the steamer Montego, of Vancouver, B.C., in recognition of the service rendered to the crew of the French steamer Hien Tien which was wrecked April 8, 1921. The medals and diplomas will be forwarded.

### Where Some Things Are Cheap

Japan's largest bathhouse was opened a few days ago at North Yokohama. The building is of white brick and includes dressing rooms, bathing compartments, a barber shop, a lunch room and a reading room. One can get a bath for half a cent, a hair cut for a cent and a half, and two shaves for a nickel. No charge is made for tea or for use of the reading room, in which are all the latest newspapers and magazines.

## Immigration From Europe Shows Big Increase During The Past Year

### Neighbor Telephones

Farmers in North Saskatchewan Have Barbed Wire Phone Lines

Farmers in Northern Saskatchewan and especially around the Meuron district are determined to have telephone connections. If they cannot for financial or other reasons, connect with Government lines then they will build private, or "neighbor" phones as they are designated in these parts. A large number of these have been put up during the past year. Barbed wire fences are favorite mediums, and popular trees, with barbed wire along between, bring the connections up to farm dwellings.

There is one difficulty, however, during spring and summer months, when the frost disappears from the ground the barbed wire telephone connections become balky at times, probably in the early morning hours or late evening, neighbors can talk to each other quite easily, and rings are plainly heard, but during the day one can often ring repeatedly and not be heard.

This being the case at present the farmers, having "neighbor" phones, with barbed wire connections, are busily engaged substituting real telephone wire for the barbed wire, and find that for very little cost they can yet have their talking devices. Even these crude connections are proving very valuable, and time and dollars are saved, especially at this time of year, when every minute counts in field work.

Shoplifters cost the stores of New York City more than a million dollars a year for goods stolen.

The Amazon River is 3,400 miles long and 150 miles wide at its mouth.

Canada is rapidly becoming a melting pot for continental European races. As compared with immigration from the British Isles and from the United States for the two fiscal years ending March 31, 1921, the accession of peoples from the continent of Europe showed a remarkable increase. Immigration from that region for year ending March 31, 1921, was 224 per cent. more than that in the year ending March 31, 1920. The increase for the British Isles in the same two years was only 25 per cent. Following are the figures. Year ending March 31, 1920—from the British Isles, 48,559; from the United States, 5,007; from other countries, 5,007; total, 117,336. Year ending March 31, 1921—from the British Isles, 74,262; from the United States, 48,059; from other countries, 26,156; total, 148,477.

In comparative statement for the years 1919-20 and 1920-21 giving the immigration into Canada, classified as to sex, a larger proportion of males came from the United States than from European ports. The influx through ocean ports during the year ending March 31, 1920, according to sex, was as follows: Males, 14,178; females, 37,056; children, 15,847; total, 67,081. In the following year European immigration was divided as follows: Males, 43,047; females, 38,075; children, 19,206. The statements for immigration from the United States show: Year ending March 31, 1920—Males, 26,694; females, 12,361; children, 10,611; total, 49,666. For the year ending March 31, 1921—Males, 26,761; females, 11,392; children, 8,396; total, 46,550.

Farmers and mechanics head the list of immigrants for the year ending March 31, 1921. Following are the figures, showing the influx according to occupation, and including male, female and children: Farmers or farm laborers—Via ocean ports, 23,716; from the United States, 17,744. General laborers—Via ocean ports, 9,639; from the United States, 7,419. Mechanics—Via ocean ports, 5,513; Traders—Via ocean ports, 6,402; from the United States, 544. Female servants—Via ocean ports, 5,432; from the United States, 2,004. Not classified—Via ocean ports, 35,079; from the United States, 5,614.

Immigration by destination, classified as to provinces, for the year ending March 31, 1921, was as follows: Nova Scotia—Via ocean ports, 2,217; from the United States, 951; total, 4,168. New Brunswick—Via ocean ports, 866; from the United States, 1,017; total, 1,883. Prince Edward Island—Via ocean ports, 49; from the United States, 253; total, 302. Quebec—Via ocean ports, 14,019; from the United States, 7,081; total, 21,100. Ontario—Via ocean ports, 49,103; from the United States, 13,469; total, 62,572. Manitoba—Via ocean ports, 2,289; from the United States, 4,360; total, 12,649. Saskatchewan—Via ocean ports, 7,335; from the United States, 6,057; total 13,392. Alberta—Via ocean ports, 7,097; from the United States, 5,841; total, 12,938. British Columbia—Via ocean ports, 10,439; from the United States, 4,078; total, 14,517. Yukon Territory—Via ocean ports, 4; from the United States, 1,091; total, 1,095.

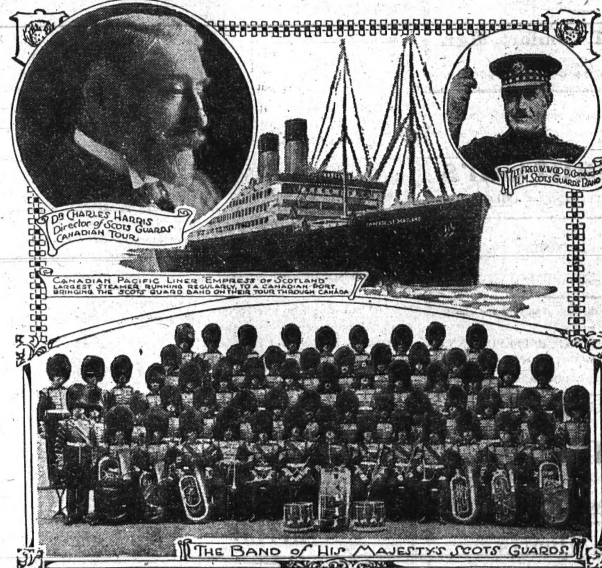

Chinese immigration for the year ending March 31, 1921, totaled 2,435, and the average for the 10-year period terminating March 31, 1920, was 8,187. Last year's influx showed a decrease of 23 per cent. Japanese immigration dropped off 28 per cent. in the last fiscal year, and the average for the same 10-year period as above was 719. Hindu immigration has practically ceased, only 10 having arrived in the last fiscal year. During the last 10 years only 407 immigrants, a yearly average of 10, of the 2,435 Chinese who came to Canada in the last fiscal year, 1,559 were admitted as exempt from the head tax, and \$85 upon payment of \$500 each. The first head tax of \$50 was imposed upon Chinese in 1885. This amount was increased to \$100 on January 1, 1901, and to \$500 on January 1, 1904.

Following is a comparison of the last two fiscal years on Chinese immigration: 1919-20—Exempts, 181; paying tax, 365; registered for leave, 5,519; total revenue, \$538,470. 1920-21—Exempts, 1,550; paying tax, 885; registered for leave, 8,807; total revenue, \$474,322.

Would Stop Making of Oleomargarine  
A. W. Niles, Independent Commissioner, has given notice of his intention to move in the House "that the manufacture and importation of oleomargarine should be discontinued in Canada after Sept. 1, next."

The waters of the Grand Falls of Labrador have excavated a chasm thirty miles long.

## A BAND WITH A HISTORY

That splendid British regiment, the Scots Guards, as they are known to day, looks back to the merry monarchs, Charles I., as the chief author of its regimental being. In 1649 King Charles authorized the Marquis of Argyll to raise a regiment of 1,500 men to protect the recently planted Scottish colonies in Ireland. It was a fateful beginning. The regiment had its birth in a troublesome job, and has fared in glory on troublesome jobs ever since. Its history is the history of Britain's wars, and it is a long history and a stirring history, for through all the almost 500 years that have since rolled by, it has been only now and then that the Scots Guards have languished at home in peaceful ease. Their colors have dappled in the bullet-ridden breeze of every country, from Hull to Halifax, in which Britain has had a war, and as Kipling intimates, that is a long way if you go in the right direction. If they weren't with Wolfe at Quebec, it was because they were otherwise engaged in saving down the blessings of British civilization with claymores, bullet and bayonet, and altogether the Scots Guards has taken a giant part in Britain's big and age-long task of

making the world safe for democracy. In the days before Charles and his jovial court, the hard fighting Scots were not popular in England. Their stout blows were usually directed toward home and if their weapons employed their talents to the full advantage it was necessary to go farther abroad. Thus, we find a company of Scottish Guards upholding the national reputation at the court of the French King, Louis XI. When a Scottish King came to England, the Scots Guards followed, and most of them later found their way into Argyll's force, since when the regiment under one name or another has retained its entity, and has added to its standard the names of most of the historic battles of the British army as well as a cloud of others less well remembered. What the Scots Guards did in the Great War would take columns to tell. The list of their battles is too long to be quoted here. They were an important part of the ever-glorious contingents. From 1914 to the end they saw it all. Again and again the Scots Guards came back from the front a battered remnant of what was once a regiment, and just as often it went back again, stepping blithely into the maelstrom of death

and destruction to do or die according to the Scots Guard's standard. The regiment's decorations won during the war included 5 Victoria Crosses, 26 Distinguished Service Orders and 661 other rewards for gallantry. It is the Scots Guard Band that Canadians are most particularly interested in at this time. They will tour Canada during the present summer, under the auspices of Canada's Great War Veterans, and Canadians will have an opportunity of hearing one of the world's finest bands in concert. This band is itself century old, and critics say it has never before achieved the high level of musical reputation that it now has, under the leadership of Lieut. F. V. Wood, who has won an outstanding position among the world's great interpretative conductors.

This tour was arranged for the benefit of the Great War Veterans' Association, and its purpose is largely to direct attention to the fine work of the Association. An important feature of the tour is the fact that it is under the direction of Dr. Charles Herries, whose unrivaled experience in connection with the British Empire's most important musical undertakings is world-wide in its scope.

### NO MORE PRIVATE CAFE

**BOOTHS AFTER THIS MONTH**  
Private booths, or any section of a restaurant that cannot be viewed from the remainder of the premises will be prohibited by law on and after June 1. This legislation is provided by the provincial government by the new Restaurant Act passed at the last assembly and is defined as an act to license, regulate and control restaurants and other places where refreshments are sold. The police are preparing to see that the provisions of the act are strictly observed.

The section which most affects several restaurants says that no part or parts of the premises of a restaurant in which food or drink is served to customers for consumption thereon shall be screened or partitioned off in any manner from the other part or parts of the said premises as to render the interior thereof completely free from observation from the remainder of the premises.

Places having stalls laid out which are not completely screened off will not be affected by this regulation, but the act will compel restaurants to remove screens or curtains from the private booths so that the interior of the places can be observed at all times.

### POPE PIUS TALKS TO WOMEN ABOUT MODEST DRESS

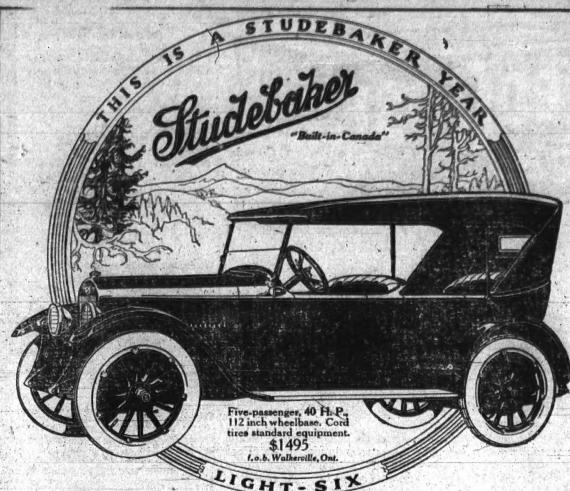

Rome, April 27.—Immoral fashions were the theme of remarks which His Holiness Pope Pius XI. addressed especially to the ladies in a delegation of the Roman aristocracy he received a few days ago. The Holy Father pointed out the opportunities the nobility had to exercise a wholesome apostolate by action and good example.

"Women, in a particular manner," he said, "can and should exert influence for the edification and sanctification of society. They should set good examples in every circumstance of life, but especially in respect to fashion, which in these days often ascends and descends to extravagance and indecency.

"This is sometimes a difficult but a very genuine apostolate. With graciousness and tact, and above all with a profound feeling of Christian virtue, women should conduct a campaign to reform customs which are today, unfortunately, largely invading society and finding acceptance. Elegance in dress is, of course, not only allowed, but necessary. Sometimes, indeed, virtue appears more beautiful when adorned also exteriorly. But many, blindly following fashions, do not fix the limit which Christian modesty requires, and not cognizant of bounds and restrictions, they do not perceive that true elegance ends where modesty is offended.

"A crusade against such follies, a crusade which can be rightly called the crusade of virtue, is expected by the Pope from every society woman fostering her soul in Christian sentiments."

On Wednesday W. O. Rose was brought before Magistrate J. W. Gresham, of Blairmore, on information laid by the A.P.P., charging him with seduction. J. McDonald, of Macleod, Crown prosecutor, conducted the case for the Crown. Detective Eagan of the Lethbridge police gave evidence as to the past character of the accused and also to the effect that he is a married man. Rose was sent up for trial at the next sittings of the supreme court. —Clareholm Review.

Your satisfaction with a car depends upon your satisfaction with its performance, appearance, economy, comfort and price.

These are the vital points. And you must get satisfaction in each one if you are to be satisfied with your car as a whole.

Consider the LIGHT-SIX from this angle.

It is essentially the same car as it was when introduced. It was right before it was offered. And it has made good in the service of thousands and thousands of owners. It is dependable. Its I-head motor is powerful, flexible and freer from vibration than any car at anywhere near its price.

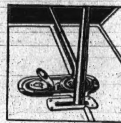

Its gracefulness are enhanced by a lasting finish. Cowl parking lights and the cowl ventilator not only add to its good looks but are necessary for complete satisfaction.

The LIGHT-SIX stands up in service with a minimum of repair expense. This, with low fuel consumption, means satisfactory economy.

We never heard of a LIGHT-SIX that was not comfortable to ride in.

And the price, \$1495 f.o.b. Walkerville, Ont., is out of proportion to its value. This price includes the theft-proof transmission lock which reduces the rate of theft insurance to the owner 15 to 20 per cent; large plate glass window in one-piece rear curtain, inside and outside door handles and other refinements.

And you get the priceless ingredient—prestige and high standing of the maker—who for 70 years has been building quality vehicles and selling them at fair prices.

Touring, \$1495; J-Passenger Roadster, \$1495; Coupe-Roadster, \$1925; Sedan, \$2425. All prices f.o.b. Walkerville, Ont.

## Freight Rates And Business

A special committee of the House of Commons has been appointed to study the whole question of freight rates with a view to bringing about a reduction in the existing high schedule, which, it is generally agreed, is having a detrimental effect on business, is operating to prevent a revival in industrial activity, and is particularly paralyzing to Western agriculture.

The problem of reducing rates in the face of an annual deficit of many millions of dollars in the operation of the National Railways is admittedly a difficult one. The National Railways badly need every dollar of revenue they can get, and a substantial reduction in freight charges may prove a very serious matter for them. Yet anything less than a substantial cut will be quite ineffective in providing a much-needed stimulus to business and an appreciable aid to the farmers of the country.

There is, however, much force in the argument that a lowering in the carrying charges of the railways will not necessarily mean a reduction in net revenue earned. On the contrary, it is well within the realm of probability that the result would be an increase in revenue. Present rates are perilously close to the line where they amount to actual prohibition of traffic, and if a reduction of rates has the effect of stimulating business and thereby increasing traffic the earnings of the railways may easily be increased rather than the much feared decreases.

Support for this view is found in a comparative study of the figures of revenue and expenditure of Canadian railways for the years 1920 and 1921. Freight rates were increased in September, 1920, and partly reduced in January, 1921, and in December, 1921. If the argument of those opposed to rate reductions is good, then the deficits in operation of the railways should have been greater in 1921 than in 1920. Yet the reverse was the case. The deficit on the old Canadian Northern system was nearly \$10,000,000 less in 1921 than in the previous year; the deficit on what are known as the Canadian Government Railways, chiefly the Intercolonial, was almost cut in two, being reduced by \$5,000,000; the Grand Trunk Pacific, which showed a loss of \$10,000,000 in 1920, dropped to just under \$4,000,000 for 1921.

These three roads between them showed a deficit in operation for 1921 of something over \$16,000,000 where in 1920 the total was over \$47,000,000. The operating profit of the old Grand Trunk was increased and so, too, was that of the Canadian Pacific.

Of course, there may have been, and undoubtedly were, other factors contributing to the betterments shown. Nevertheless, the figures would seem to point to the conclusion that rate reductions were not in themselves disastrous, but that, on the contrary, they proved beneficial and were contributing factors in bringing about a marked improvement in railway finances.

Admitting, however, for the sake of argument that substantial rate reductions will result in an increase in the operating deficit of the Canadian National Railways, the question arises whether it would not be better to face that possibility and meet the loss out of general taxation for a year or two, if, through such reduction in rates, there was marked encouragement given to agriculture, manufacturing and business generally throughout the Dominion, with a consequent lessening in unemployment and increased buying power by the people and some return of prosperity.

The present deficit on the Canadian National Railways is a heavy one, and constitutes a very real burden for Canadian taxpayers. It is almost more than they can bear, because, through lack of employment and general business depression, they have not the money. No matter how light taxes may be people cannot pay them without money and in the absence of means of earning money. But with a return of business activity and more employment the people would be able to more easily pay even somewhat heavier taxes, if necessary, to meet a slightly larger railway deficit.

The railways are one of the chief agencies in the upbuilding of trade and commerce, and if their rates are maintained at a level so high as to restrict traffic, they are not benefiting either themselves or the people and country they were created to serve, but are, as a matter of fact, killing the goose that lays the golden eggs.

The experience of enforcing a substantial reduction in freight rates as a means of reviving business throughout Canada, and giving some much needed encouragement to agricultural production, may well be tried at this time.

## Farmer Premiers

Five of the Provincial Premiers are Farmers by Occupation

When the Premier of Manitoba makes the point that he is a farmer he calls attention to the fact that farmer premiers are quite common in Canada. Leaders of the Ontario and Alberta Governments are farmers both politically and by occupation. The Premiers of Manitoba and British Columbia are Liberals in politics, and farmers by occupation. The Premier of Saskatchewan is a farmer in politics and is down in the Parliamentary Guide as a farmer by occupation. This accounts for five of the nine provincial premiers. Three of the others are lawyers, and the fourth a merchant—Vancouver Province.

Japan has built a great arch, 60 feet high, overlooking Tokio, to commemorate those who died during the war in the service of the empire.

## Japan Buying Lumber

Japanese Government Bans Production of Lumber from Native Forests

According to Mr. J. S. Sato, of Kobe, who arrived in Victoria with a party of Japanese lumber buyers, the Japanese government has decided to buy lumber from native forests. The principal reason for this heavy foreign buying is that Japan has banned the production of lumber from native forests. Inquiries for almost every type of lumber have for some time been pouring into the Vancouver Island market.

## Corns Between the Toes, Painlessly Removed

A real, sure, dependable remedy that has been lifting out corns for the past fifty years will surely lift yours out. Putnam's Corn Extractor is the old reliable corn remedy—it stands the test of time and never fails, 25c everywhere.

## Recalls Days of Nelson

Mary Ann Carr, born on Nelson's Ship, is Dead at Age of 85. Mary Ann Carr, who was born in the cockpit of Nelson's ship, Victory, near the spot where the famous Admiral fell, has just died at Port Moody, at the age of 85.

Her memory of the early days aboard the ship was fresh up to within a few days of her death. She once saw a sailor flogged. The picture of the man suffering remained vivid in her mind through her long life. Only once did she see such sight for on other occasions she was sent ashore to be spared the spectacle.

Just as there is a potential statue in every block of marble, so is there an ideal self in every man. Be, then, the sculptor of your own character.

Keep Minard's Lignum in the house

## Overcrowded Britain

An eminent statesman ventured on the other day that in spite of the war the population of Britain has increased by 2,000,000 during the last decade. He asked me whether I thought the country could support them all, and I replied in the negative, suggesting that emigration is the only remedy. The trouble is that our surplus is among townpeople and not the rural workers needed by new countries—London Sunday Pictorial.

## A NERVOUS BREAKDOWN

When the Blood is Out of Order the Nerves Are Starved. The nerve system is the governing system of the whole body, controlling the heart, lungs, digestion and brain; so it is not surprising that nervous disturbances cause acute distress. The first stages of nervous debility are noted by irritability and restlessness, in which the victims become easily annoyed by their nerves. The matter requires immediate attention, for anything but able treatment will prevent a breakdown. The victim, however, need not despair, for even severe nervous disorders may be relieved by improving the condition of the blood. It is because Dr. Williams' Pink Pills enrich the blood that this medicine has proved beneficial in nervous disorders. The nerves thrive on the better blood made by these pills; the appetite improves, indigestion is better, sleeplessness no longer troubles the nerve-shattered victim, and life generally takes on a cheerful aspect. The value of these pills in cases of this kind is shown by the experience of Mrs. John W. MacDonald, Cardigan, P.E.I., who says:—"I have much cause to be grateful to Dr. Williams' Pink Pills. I was suffering from nervous breakdown, and my condition gave alarm to both my friends and myself. I suffered almost continuously from nervous headaches, my appetite was poor, I hardly got any sleep, and in every way I was badly broken down. A friend advised me to try Dr. Williams' Pink Pills, and after I had taken them for a while there was a noticeable improvement in my condition. I continued using the pills until I had taken twelve boxes, when every symptom of the trouble was gone, and I have since enjoyed the best of health."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## Alberta Agricultural Production

The estimated cost of raising all livestock products produced in Alberta in 1921 was \$137,455,706. Of this sum grains, fodders and vegetables accounted for \$82,795,290; and mink slaughtered and sold \$17,290,414; dairy products, \$25,000,000; wool \$100,000; game furs, etc., \$150,000; poultry and poultry products, \$48,700; and horticultural products and garden stuff, \$1,600,000.

Worms are encouraged by morbid conditions of the stomach and bowels, and so subside. Miller's Worm Powders will alter these conditions at once, immediately, and will destroy worms away. No destructive parasite can live in contact with this medicine, which is not only a powerful destroyer, but a health-giving, medicine most beneficial to the young constitution.

## Cherries Lead in Bacteria

A scientist has succeeded in calculating the number of bacteria in certain fruits. He found 1,000,000 in half a pound of gooseberries, 8,000,000 in half a pound of grapes, and 12,000,000 in half a pound of cherries—Cleveland Plain Dealer.

## HOW'S THIS?

HALI'S CATARRH MEDICINE will do what no other medicine can do for Catarrh or Blandness caused by catarrh. It's so recommended by the medical profession. HALI'S CATARRH MEDICINE is a liquid, taken internally, and acts through the mucous membrane of the system, thus reducing the inflammation and restoring normal conditions. It is Dr. J. Cheney & Co., Toledo, Ohio.

## Proposed Experimental Farm for B.C.

It is reported that the next experimental farm to be established in Canada will be in Northern British Columbia, an immense tract of country of agricultural character situated in the attracting the attention of many United States farmers. Minerals, water power, fish, fur and forests are also among its assets.

The region about the Dead Sea is one of the hottest places on the globe, and the sea loses many tons of water a day by evaporation.

## Constipation Is Relieved

Prompt—Permanent—Relief CARTER'S LITTLE LIVER PILLS rarely fail. Purely vegetable—act surely but gently on the liver. Relieve after dinner distress—relieve indigestion—improve the complexion—brighten the eyes.

Small Pill—Small Dose—Small Price

Keep your Shoes Neat

**SHOE POLISHES**

## Canadian National Excursions

Plan Your Summer Trip Via the National Route

The Canadian National Railways announce their summer excursion rates to the Pacific Coast and to Eastern Canada. The Pacific Coast trip, through the Canadian Rockies, includes choice of route on land and sea, going or returning. A magnificent 750 mile voyage between Prince Rupert, Vancouver, Victoria and Seattle may be taken. The trip to Eastern Canada includes all rail and lake and rail, with choice of routes. See Toronto, Quebec, the Thousand Islands, and the magnificent Niagara Falls. Sail down the St. Lawrence.

The Canadian National trains cross the Rockies at the lowest altitude, the easiest gradients, and in view of Canada's highest peaks. Break your journey and stay at Jasper Park Lodge, Lac Beauport, Jasper, Alta. The lodge is open from June 15th to Sept. 15th. It is modern, comfortable, has a dancing pavilion, and commands a wonderful view of all the prominent mountain peaks. On your trip to the East, have your travel plans include a few days at "Mammoth Park," 115 miles east of Winnipeg. Decide now to take a holiday. You owe it to yourself and family. Get suggestions and full information as to fares, reservations, train service, etc., from any Canadian National Agent. Ask for free tourist booklets.

## Nervous Breakdown COULDN'T SLEEP NIGHTS

To those on the verge of a nervous breakdown the following symptoms present themselves: nervous headache, dizziness, depression, fitful, disturbed, restless and unrefreshing sleep, often troubled with frightful dreams, aversion of crowded places, dread of being alone, horror of society, etc.

When the nerves become affected in this way the heart generally becomes affected too, and on the first signs of weakness of the heart or nervous flagging energy or physical breakdown do not wait until your case becomes chronic, but take the medicine that will at once quieten the nerves, strengthen the heart and build up the entire system.

This you will find in MILBURN'S HEART AND NERVE PILLS.

Mrs. M. Dampand, Young's Cove Road, N.B., writes:—"I was bothered with nervous headaches and dizziness, could not sleep at night, and my appetite failed. I took one of your Nervous Breakdown when a neighbor told me to try Milburn's Heart and Nerve Pills. The first box I used I was better and would advise anyone who has nerve trouble to take them."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The C. D. Milburn Co., Limited, Toronto, Ont.

Low Price of Manitoba Farm Land. That land in Manitoba is equal to that of lands in Illinois and Iowa, where the land is sold at \$400 an acre. is one of outstanding statements of Prof. Bracken, of the Agricultural College, in his report tabled in the Legislature. In the survey covering the Dominion the average price of Manitoba farms was returned at \$35.

Requisite on the Farm—Every farmer and stockholder should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for aches in the family, but because it is a powerful and "sure" remedy of great potency. As a substitute for sweet oil for horses and cattle affected by colds, it will surpass anything that can be administered.

## The Mysterious Dogs

Method Adopted by Farmer to Protect His Fruit Crop

A photograph that acts as a policeman has been rigged up by a fruit farmer in the United States in his orchard.

This is the way he worked it. He rigged up an old photograph inside an unused beehive and had a record made of the fierce barking of dogs. Then he connected the machine by an electric wire with his house, which was within sight of the orchard. As soon as he sees an automobile stop in the road, he turns on the switch and the rapiers are frightened by the barking of dogs, though they cannot see the animals.

Ask for Minard's and take no other

## War Base at Suez Has Been Dismantled

Was One of Greatest Centres During World War

What was once considered the greatest military dump in the world, at Kantara, the British army base on the east side of the Suez Canal, has now almost entirely reverted to the wilderness of sand and silence whence it rose.

Its passing marks the demise of one of the most important "war baby" soldier cities.

In 1914, Kantara was merely the name of a "place" on the Suez Canal, 15 minutes by train from Port Said. With the beginning of the Palestine campaign, the transformation began. Pioneers, engineers and army service corps detachment mapped out a town.

There were erected enclosures for cattle, horses, mules, donkeys, fodder, for great guns and small lumber carts. Later there appeared enclosures for prisoners and the miscellany of cantons, contractors' huts, officers' quarters and barracks that made up a great war centre.

When the armistice was signed, Kantara's stores included quantities of every appearance of war. Its dismantling began in 1920. Contractors rushed in and secured great bargains. Gradually the vast accumulation dwindled, until recently the Disposals Board finished its work and the site was handed over to the Egyptian Labor Corps—a delapidated, empty hulk.

## Dye Skirt, Dress Or Faded Draperies in Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, curtains, draperies, stockings, handkerchiefs, everything in the household—except hair—any color desired. Perfect home dyeing is guaranteed. You never dye before. Tell your druggist whether the material you wish to dye is wool or silk or whether it is linen, cotton, or mixed goods. "Diamond Dyes" never streak, spot, fade, or ruin.

## A Vegetable Octopus

South American Plant Grows Life From Human Beings

A plant found in South America—a kind of vegetable octopus—has been known to kill human beings. One specimen was found by a naturalist near Lake Titicaca. This man, attracted by the agonized howling of his dog, found the animal "enveloped in a perfect network of fine, rope-like tubes and fibers," and it was only with greatest difficulty that he cut them away.

Whilst freeing the dog he felt "the fibres curl like sinuous living fingers about his hands," and it required all his strength to free himself from the grip of the plant. Both man and dog died miserably and bloodied by the attack of this "land octopus."

The "cannibal tree" of Australia, which resembles an enormous pineapple—some nine or ten feet high, with a fringe of huge, strong leaves at the top—has a reputation of being able to crush the life out of a human being—the leaves closing on him like a trap and mangle his body.

The "telegraph plant"—a native of India—has tremendous electrical powers. Each leaf is composed of three leaflets, the largest of which stretches out to the sun during the day but hangs down at night, while the two smaller ones move in circles, round and round, by means of jerking motions.

Severe shocks have been experienced by unsuspecting people, who have investigated too closely the "perpetual motion" of the leaflets, and it is conceivable that to anyone with a weak heart—such shocks might prove fatal.

## Grazing Leases Altered

Information has been received in reference to amendments to the grazing leases from the Timber and Grazing Lands Branch at Ottawa, in respect to an Order-in-Council dated April 12th and applicable to Manitoba, Saskatchewan, Alberta and the Peace River tract. According to the document, "Provision is made for the renewal of grazing leases now in existence, having less than five years to run, for the payment of rental at the rate of two cents per acre per annum. This 'Mother Order' was for improvement left by a lessee on his leasehold. The four years cancellation is eliminated."

Worms cause fretfulness and rob the infant of sleep, the great scourge of the mother. "Mother's Own" Worm Expeller will clear the stomach and intestines and restore healthfulness.

France Has Largest Sailing Ship. The largest sailing ship afloat is a French five-master, La France, a steel bark of 5,635 tons burden, which carries 30 sails and a crew of 64. Her best speed is 22 knots in 24 hours, though she has logged as much as 42 knots in a hurricane. Not many steam freighters could better these figures.

## Mrs. Edmonds Makes Gain Of Fifteen Pounds

"I Honestly Believe Tanlac Saved Her Life," Declares Husband In Remarkable Statement Praising Master Medicine.

"The way Tanlac has restored my wife's health and built her up makes me one of the happiest men in Canada," said Wm. A. Edmonds, 358 King Edward St., Winnipeg.

"Two years ago her health began failing and she suffered terribly from indigestion, pain on the stomach, and heart palpitation. Her head and back pained her continually and she had nervous spells when she would shake like a leaf. Finally her strength left her entirely and she was confined to her bed for one solid year. 'Everything possible' was done for her and almost as a last resort, I had her try Tanlac. After taking it while she began to improve, and to-day her health is fully restored. She is not only in splendid health, but she has gained fifteen pounds in weight. I honestly believe Tanlac saved her life, and I am more than grateful." Tanlac is sold by all good druggists.

## Save the Surface

America Spends Almost as Much on Cosmetics as on Education

The American people spend annually \$750,000,000 for face powder, cosmetics and perfumery and \$1,000,000,000 for education. It is interesting to note that the amount America spends annually for face powder and its accessories is almost as much as she spends for her entire educational system. Look at it! America thought about as much of the outside of her head as of the inside. And as a matter of astonishing fact, the amount actually spent by America for face paint annually exceeds all she pays for the salaries of the teachers in all the high schools who are trying to get something into the heads of pupils in between times while they are applying the paint on the surface. —The Christian Herald.

Praises this Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

## Growth of Canadian Industry

Illustrating the growth of the manufacturing industry in Canada, J. B. McKinnon, president of the Canadian Manufacturers' Association, stated that Canada's exports of manufactured goods represented in value \$47 per head of population, whilst the export of United States manufactured goods represented \$50 per head of population.

## CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a "Freezone" on an itching corn. Instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes and the calluses, without soreness or irritation.

Chinese Guarded Silk Secret. For centuries after its first discovery China carefully preserved the secret of silk culture, and amassed great wealth by exporting it to India, Persia and Arabia.

MURINE Night and Morning. Eyes, Itchy, Red, Swollen, or Blurred. Itch, Smart, or Burn. If Sore, Irritated, Inflamed, or Your Eyes Gritted, use Murine. It removes every particle of dirt, and cures all eye troubles. Safe for Infants and Children. At All Druggists. Write for Free Book. Send for Sample to, Chicago.

PE-BU-NA COMPANY 344 St. Paul St., Montreal

## Reply Of Russia Considered As Basis For Further Negotiations

Genoa.—Russia's reply to the Allied memorandum, which was presented to Signor Schanzer, president of the economic conference, is generally regarded as conciliatory. At least it is considered a basis for further negotiations.

His suggestion that all the tangled financial problems be submitted to a mixed committee of experts named by the Genoa conference, provides a means of escape from the present superheated atmosphere, which appears to be unfavorable to the settlement of the property question, which Great Britain and lesser powers will approve.

France expresses great disappointment at the reply and Belgium is far from satisfied. M. Barthou, head of the French delegation, declared after an examination of the text that the reply did not get anywhere and was not really an answer to all of the Allied proposals. Consequently, it will not be certain until after he has conferred with the Government in Paris whether the Russian proposals will be accepted by the French as a basis for continuation of the discussion.

In the meantime the future of the conference is highly uncertain. Some of the delegates believe it will close precipitately, or perhaps it would be truer to say that they hope it will. Other delegates predict that it will last six weeks longer and go into the Russian financial tangle in great detail. The latter seem to be in the majority and indications are that the conference may be prolonged indefinitely.

### Baltic "Entente" Formed

Alliance Said to be Cornerstone for Europe's Peace

Riga, Latvia.—The Baltic "Entente" formed by Poland, Estonia, Latvia and Lithuania in concert at Warsaw in March is hailed by the Baltic press as a cornerstone of peace for this part of Europe.

Representatives of the four countries mutually agreed that all conflicts and disputes between them should be settled in an amicable manner only.

All important questions upon which the four may be unable to agree are to be referred to a court of arbitration in accordance with the rules of the League of Nations.

Each of the four contracting States is obligated in future to inform the other three of the texts of the agreements concluded by that State with any other nation.

The convention is to hold good for five years and to be automatically renewed thereafter from year to year, unless a six months' notice of its abrogation is given. It is said in diplomatic circles that Lithuania may join the Baltic Entente cordiale later.

By making your purchases from your home merchant, you are contributing direct to the prosperity of the community in which you live.

## Lord Northcliffe Says Embargo On Cattle An Insult To Canada

London.—Declaring that "he was very glad that he declined to become a member of the Coalition Government of Great Britain, if only because he would not want to be one of those who helped to begin the end of the British Empire by losing the prairie provinces of Canada," Lord Northcliffe devoted the greater part of an address at a luncheon of the Empire Press Union to condemning the "great slur we place upon the people of Canada" by the embargo on the importation of Canadian store cattle. Lord Northcliffe is honorary-treasurer of the Empire Press Union.

Lord Northcliffe said: "We are not watching Canada closely enough, especially as to what is happening in the prairie provinces. One of the cleverest men I ever met, Lord Shaftesbury, said to me 20 years ago: 'I wonder if I am right in thinking that the future of the empire is largely wrapped up in what happens in Alberta and Saskatchewan.'"

Continuing, Lord Northcliffe said: "I don't blame the British people for not giving attention to Canadian affairs. If I were issuing papers in New York—which God forbid—I should not give much attention to affairs in Australia or New Zealand,

### Alberta's Natural Resources Question

Edmonton.—Alberta's campaign for the recovery and conservation of its natural resources will be continued along lines to be submitted at once to the Executive Council of Provincial Government, with the chances in favor of this province having to seek terms on a somewhat different basis from the other prairie provinces because the situation is different in the case of Alberta from that in either Saskatchewan or Manitoba. Whether or not any definite settlement of the question can be put through the Dominion House at the present session is not yet certain, but at the moment the prospects in that direction are not as bright as might be expected.

### Regina Coat of Arms Presented to Liner

City Appreciates Selection of Name for New Steamship

Montreal.—Mayor James Grassick, of Regina, presented the White Star Dominion liner Regina with a replica of the city's coat of arms at a luncheon aboard the new passenger liner. Nearly three hundred agents and friends of the company were entertained.

P. G. Ward, representing Premier C. A. Dunning of Saskatchewan, and C. Cook, manager and secretary of the Regina Board of Trade, were also present, and together with the mayor voiced the city's appreciation of the selection of her name for the new vessel.

### For Peace of Europe

Closing the Ranks Against Tyranny of Brute Force, Says Lloyd George

London.—Premier Lloyd George has sent the following telegram to the Congressional Union of England and Wales. In response to the Union's message to him assuring him of the organization's sympathy and support in his efforts to secure the peace of Europe:

"The humanitarian forces of the world are closing their ranks in the new crusade against the tyranny of brute force. Genoa has sounded the tocsin of peace. We shall not rest until we have won."

### Premier Hughes Denies Report

London.—Premier William Hughes, of the Australian Commonwealth, says Reuters Melbourne correspondent, denies a newspaper statement that he favored cutting up West Australia into three States. "He says there will be time to talk of subdivision when they get many more people in Australia," he said.

## Lord Northcliffe Says Embargo On Cattle An Insult To Canada

but should concentrate, as the American papers now very largely do, on the more interesting foreign affairs of the moment." Englishmen often very frankly say they are bored with this matter of the great slur we place upon the people of Canada by reason of the embargo on their cattle. One or two public men, Lord Beaverbrook in particular, have realized this problem. I have not his knowledge of Canada, though I certainly share his admiration for Canada.

"Canadians are not a very noisy people. We did not hear much about them going into the war, but they went in, and when there, they did great things. They are not talking very much about the embargo, except in the prairie provinces, which are far removed from Montreal and other great news centres. 'I assure you that while you can say to Canadians: 'You shall not enter our house, you cannot say to them 'you shall not enter because you have a loathsome disease.' I have talked about this repeatedly with English news breeders. It is purely a question of protection. Formerly it was a concession to the Irish, but it is no longer an Irish question at all. This thing affects the reputation of every Canadian farmer."

## Floods Cause Immense Damage

Assiniboine River Overflows Banks and Ruins Crops

Winnipeg.—Heavy rains have contributed to a further rise of the Assiniboine River and protecting dykes along its banks have been swept away and the water is now creeping over thousands of seeded acres hitherto out of danger.

A fleet of flat boats has been put into operation in the Poplar Point area, and farmers are paddling to and from town releasing many persons who had been marooned in the upper stories of their homes. Four thousand acres of seeded land is now under water there. Farmers in many districts are driving their cattle to the bush and removing their valuables to safe spots in the hills.

For a 12-mile strip, three miles wide, the river has overflowed its banks at Iberville. Families, living in this district, are leaving their homes and seeking shelter in the highlands near Marquette. With the help of nearby farmers they have driven their cattle to the hills. The prospective crop estimated at \$500,000 has been washed away, 40 sections of seeded land being inundated.

### Will Surmount Difficulties

King Assures Belgium of British Empire's Sympathy

Brussels.—King Albert gave a banquet in the palace to King George and Queen Mary. In toasting his royal visitors, King Albert said Belgium still was suffering from the destruction and the economic troubles caused by the war. The king added that Belgium needs at the same time, reparations, peace, work and security, a complex necessity which had determined the policy Belgium had resolved to pursue in full agreement with her allies.

Replying, King George said if there was one thing certain in the uncertain epoch which the world was passing, it was that the difficulties of Belgium could rapidly be surmounted, thanks to the "signon" of Belgian statesmen and the indomitable vitality of the Belgian people. He added that in her progress towards the great future ahead of her Belgium always would have the sympathy of the British Empire, which fought beside her in the war.

### Bringing Big Sugar Shipment to Canada

Cargo of 5,600 Tons Largest Ever Shipped from Jamaica

Kingston, Jamaica.—The Canadian Pacific steamer Montezuma sailed for Montreal with 5,600 tons of sugar, the largest cargo of sugar ever shipped from this island. To date Canada has purchased over 75 per cent of the sugar crop of Jamaica.

About a year ago Canada, extended to Jamaica a customs preference similar to that granted to other portions of the British West Indies some years ago. During the first nine months of the Canadian preference, imports of Jamaica coffee and coconuts, grapes, guavas, pineapples, hibiscus and skins doubled, while vegetable oils increased fourteen fold and raw sugar went up 4,900,000 pounds. About six weeks ago the Jamaica Legislature ratified a measure granting a customs preference on Canadian products, but the preference, in most cases is only five per cent.

### WESTERN EDITORS

H. D. Pedlar, Editor of The Herald, Oxbow, Saskatchewan.

## VIOLENT STORM IN EASTERN MANITOBA

CYCLONIC WIND CAUSES GREAT DAMAGE TO DISTRICT EAST OF WINNIPEG

Winnipeg.—Striking Manitoba at a point near Gimot, about 30 miles east of Winnipeg, a cyclone swept farm barns from their foundations, wrecked a number of houses, blew down transmission towers of the Winnipeg Electric Company and the city hydro system, causing Winnipeg to be entirely without electric power for two hours.

Reports state that several persons had been injured, but no fatalities were caused so far as could be ascertained.

### Vancouver Wants Drydock

Essential to City's Progress Opinion of Board of Trade

Vancouver.—As the result of action taken at a special meeting of the Board of Trade here, at which it was the unanimous opinion that a drydock for Vancouver is essential to the future progress of the city, a telegram was sent to the Government at Ottawa by President R. Kerr Houlgate, urging the Federal authorities to continue the subsidy to the drydock here as arranged for by the late Government, so that the work of construction can be proceeded with.

Prime Minister Mackenzie King is also being informed that the board is arranging a mass meeting of all the municipalities and organizations in the lower mainland of the province to discuss plans for further efforts toward securing a drydock for this port.

Increase in Food Prices  
Washington.—An upward trend in the retail cost of the Canadian price statistics made public by the Bureau of Labor Statistics of the Department of Labor. Reports from 15 cities showed increases from March 15 to April 15, ranging up to three per cent, while only four reported decreases and only one of these, Fall River, with two per cent, showing more than one-half of one per cent decline.

## Late Government Denies Contracts Let For Political Ends

Ottawa.—Charges that the late Government let contracts for rails, accessories and repairs to equipment on Government railways on October 5, 1921—two months before the general election—to firms for political advantage, and ignored its own shops at St. Malo, Moncton and other places, were made in the House by George Bolvin, Liberal member for Sherbrooke. The unemployment situation was a great last year, and yet the late Government made no move until the election was declared, Mr. Bolvin said.

The question was whether the National Railways were administered by the board of management or by the late Government, Mr. Bolvin said. He declared the Government passed an order-in-council authorizing the Minister of Labor to put a gun to the head of the board or to wield the big stick, telling them where to place the orders for rails.

Hon. J. A. Stewart, former Minister of Railways and Canals, heatedly denied that any such order-in-council was ever passed. The Minister of Labor was only concerned directly through his department in being in touch with the unemployment situation.

The House was discussing an item in last year's supplementary estimates for railways and canals.

On an item of \$750,000 to provide for expenditure for rails, accessories and repairs to equipment on Government railways to December 31, 1921, Hon. W. C. Kennedy explained that this money was required for payments on contracts let on October 5, 1921, for the purpose of helping to relieve the unemployment situation.

Mr. Stewart said that neither the Government nor the department had anything to do with their actual placing of these contracts. Where orders were given the railway boards were asked to consult with the Department of Labor and place the contracts in the areas where they would do most good in relieving unemployment.

George W. Kite (Liberal, Cape Breton South), urged that if possible some steel rail orders should be placed in the city of Sydney. There had been, he said, very serious unemployment there. The Government would soon require more rails, and even if it anticipated next year's requirements, the benefits which would result would be well worth the expenditure.

### B.C. Maps For British Ambassador

Victoria.—Premier John Oliver sent special maps of British Columbia prepared by Major G. Galt, head of the Government Map Department, to Sir Auckland Geddes in Washington, British ambassador to the United States. When Sir Auckland was in Victoria a few weeks ago with Lady Geddes, he told the Premier that he was particularly interested in British Columbia, being the coast province of Canada on the Pacific. He asked the Premier for maps so that he could have the latest geographical data on this province for use in the embassy.

Hon. T. A. Cresser, Progressive leader, said that he usually found himself in sympathy with the "general whip" of the Government. He must not, however, dissent from the "strange and remarkable doctrine" which Mr. Kite was preaching. The late Government had ordered rails for this year last October, just two months before the general elections. Mr. Cresser warned the Minister of Railways that he would reserve the right to criticize similar action by the present Government in the freest possible manner. The only consideration that should govern in purchasing rails and supplies for the National system was that of getting the best supplies for the smallest sum.

Mr. Kite replied that western farmers found that they were suffering from hard times so they came to Ottawa and demanded a wheat board. The purpose of this board was to get a higher price for the farmers' wheat. Of course when the farmer obtained a higher price, it meant that the consumer paid more for the wheat. Conditions in the west had made it necessary for the farmers to seek relief. Mr. Kite was prepared to support them in their effort, but he considered it unkind, that Mr. Cresser should oppose his efforts to obtain relief for the steel workers of Nova Scotia.

### King George Eulogises Heroism of Nurse

Deposits Wreath on Spot Where Edith Cavell Was Executed

Brussels.—The heroism and self-sacrifice of Edith Cavell were extolled by King George of Great Britain who with Queen Mary is here for a state visit to King Albert and Queen Elizabeth of Belgium. The British king laid a wreath of entwined Belgian, French and British flags upon the spot where the British nurse, a large number of Frenchmen, and three Belgians, were executed during the war by the Germans.

As he deposited the wreath, King George said Miss Cavell left the world an imperishable legacy of courage and devotion which had a counterpart in the martyrdom of Joan of Arc.

### Financial Crisis in Canton

Government Bank Notes Have Depreciated Fifty Per Cent

Amoy.—A financial crisis in Canton, the seat of the Southern Government, is reported in despatches received here. The banks are closed; business is paralyzed and the Government bank notes have depreciated 50 per cent of their value. The crisis is attributed to the agitation caused by the operations of the Southern Government in preparation for its projected campaign against the north and the consequent political complications.

Lash for Persistent Criminals  
Toronto.—Automatic sentence of the lash to persistent criminals is recommended in the report which the grand jury at the spring assizes peremptorily demanded that a mandate for the completion of their session at Quito.

## Britain Still Hopes That Peace In Ireland May Be Restored

London.—The Government was again sharply attacked in the House of Commons for failing to protect the three British officers' recently kidnapped in Ireland. Austen Chamberlain, the Government leader, replying, repeated that General Sir Nevill Macready, the British commander in Ireland, had seen representatives of both parties but they had all assumed him they knew nothing about the incident although they were doing their utmost to ascertain the facts of the case.

Mr. Chamberlain admitted that a grave issue was before the House—whether the Government should decide that the experiment in Ireland had been tried long enough and whether the Government, acting under a sense of horror at certain murders should declare the treaty at an end and step in and assume once more the duty of preserving law and order throughout Ireland. He had thought deeply about these matters but begged parliament to think of the larger issue, and eyes said the

pain and anguish of these incidents kept their eyes fixed on the great result which might yet be obtained and which would mean accession of unity and strength to the empire.

Mr. Chamberlain appealed earnestly for a continuance of the experiment. He believed that the power and influence of the provisional government were increasing and that, given a little time, the provisional government would secure a mandate from the Irish people and establish its authority throughout the 26 counties.

"For heaven's sake," Mr. Chamberlain continued, "after the bitter experience of the past, let us give the provisional government a chance. We shall not save the lives of loyal subjects in Ireland by restoring what must be civil war, that could only end in subjection, not in reconciliation."

The motion for adjournment on which the debate was raised, was defeated 258 to 65.

### Land Map of Manitoba

The total number of quarter-sections of Crown land still available in each township is shown on the 1921 edition of a land map of Manitoba, Saskatchewan and Alberta recently issued by the Department of the Interior; likewise the number of quarter-sections of unoccupied and uncultivated lands held in private ownership that are purchasable from the nonresident owner. This latter feature, showing at a glance what lands are for sale, should prove of great service to the land seeker. Supplementary to the map, the Department has had compiled for each district, lists containing information as to the price asked for the land, terms of sale, nature of soil, acreage fit for cultivation, value of buildings and other matters helpful to the prospective purchaser. With such information in his possession the intending settler may then negotiate with the owner of the land.

Another important feature of the map is the Railway Belt information which has been shown in three different shades of colour, on each side of all railway lines, to signify land within 5, 10 or 15 miles of a railway. Among other details shown are the Dominion Parks, the forest reserves, land districts and agencies, surveyed townships, and railway information to date. A copy of the map, also a list of the unoccupied lands for sale in any particular district may be obtained free of charge, upon application to the Natural Resources Intelligence Branch, Department of the Interior, Ottawa.

Porky says that the reason women should never become preachers is that they would have so much to say their murrings would puzzle, not only the congregation, but God himself.

A Ukrainian engineer is reported to have discovered a method by which radio messages may be sent to a definite receiving station without the danger of being intercepted by other stations. It is stated that by means of a simple apparatus the so-called "locked power line" of the magnetic field may be straightened out and grouped into parallel rays. These rays are said to do away with the necessity of aerials. If this report is true, it seems that we are on the verge of a new epoch in radio. However, we shall have to wait for complete details before passing judgment on the merits of this new invention.

Mrs. K. K. Good was a visitor here from Crows' Nest on Tuesday.

A district press meeting will be held at Pincher Creek on Saturday afternoon. J. D. S. Barrett, of Coleman, is convener.

D. R. Melvor, former general merchant of Cowley, and now following a similar line at Gibbons, Alberta, was a visitor here on Tuesday of this week.

The United States supreme court has decided that liquor within the boundaries of the United States, enroute from one foreign port to another, can be seized under the National Prohibition Act.

Mr. A. E. McPhail, who recently severed his connection with the Upton tailoring firm, has decided to open up on his own, and has secured a lease of the Alberta corner, where in a few days he will be fully equipped and ready for business in tailoring, pressing and cleaning.

Miss Victoria Chung, of Victoria, B. C., has graduated in medicine. Miss Chung is a daughter of Chinese parents and was born in Victoria and intends to practice as a medical missionary under the Presbyterian church in China.

The waters of the streams flowing through town are getting so high now that bootleggers or blind pigger are wearing smiles. Probably they have lifted the lid off the booze receptacles in the hope that the waters from the mountains will increase their store.

People coming from the east are so loaded up with reports of oil discoveries in this province that railway conductors become very aggravated over the numerous silly questions that are asked them. One tourist the other day referred to a big dust drift near the railway at Kipp as a beautiful anticline and wanted the conductor to stop and give him a chance to stake a claim.

A congregational meeting will be held at the close of the evening service at the Union church on Sunday next, when important matters will be considered.

The local Salvation Army Corps have made arrangements with the Fernie Young People's Silver Band to give a concert in the Orpheum theatre on Sunday evening next at 7.30. Everybody welcome. Collection taken to defray expenses.

## Local and General Items

For funeral flowers phone 212, Crows' Nest Pass Undertaking Co. Mr. and Mrs. A. E. McPhail returned Tuesday from a business visit to Calgary.

**FOR SALE**—One Heintzman Piano, a bargain at \$350.00. Apply to J. S. Pizer, Box 193, Coleman.

J. C. Hendry, solicitor of Lethbridge, was in town yesterday, attending the district court sitting.

Rev. Father McCormick left Coleman Tuesday night for Ontario, where he will spend a couple of months at his home in Alexandria.

Mrs. W. McVay leaves here the latter part of next week to visit the home of her childhood in Scotland, and will be away some months.

**LOST**—Brooch, horseshoe shaped, between Telephone Exchange and Post Office on Wednesday night. Finder please return to The Enterprise.

The only surviving child of the late Mr. and Mrs. F. Pokorney died Tuesday, following a brief illness. The remains were laid to rest in the Blairmore cemetery yesterday afternoon. Little Blanche was eight years of age and was predeceased by her father four years ago and her mother but a few months.

Films for use in the Red Cross health education campaign are expected to arrive in Alberta shortly. A special appropriation for this work has been made by the National Executive.

Pincher Creek Red Cross Juniors are very active. In the various schools of the district the junior members are working on health posters, some of which may be useful as for other units.

Capt. W. A. Beebe returned yesterday from a visit to Cincinnati, Chicago, Detroit and other little towns in the U.S.A. Capt. spent a few days returning with his son and daughter in Regina, Sask.

The Foremost branch of the Red Cross are reorganizing and expect to extend the scope of their work considerably. They are paying special attention to the development of the Junior Red Cross.

The town council sat as a court of revision yesterday, when in the neighborhood of forty-five appeals against the recent assessment were considered. In most all cases the appeals were disallowed.

The Pincher Creek high school basketball team played on the local Union church court on Friday last, winning by a score of 27 to 19. The game was fast and interesting and was witnessed by a large crowd of local folks. The score at the end of the second period was a tie and an overtime period was necessary. The visitors were Guy Dubuc, Francis Fry, Hank Campbell and Glen Mitchell. Mr. D. Siple kindly gave the boys a motor trip here and back.

Under existing conditions the amenity of the English countryside is being rapidly destroyed. The roads are as perilous as an unenclosed railway track. Every country town and village is invaded by the new vehicles.

Pedestrians are driven from the road. The smooth surface gives no foothold to horses in wet weather, and they are now being made useless to the farmers and the owners of horses. It is useless to attempt to return to a happier age; but it is essential that the old road system should be modified to suit the new conditions. It is, in fact, as requisite to provide separate roads for motor traffic as it was to provide them for trains when railways were invented. The separate road must be the next development.

The fapper's idea of looking pleasant before the can era is to throw one leg across the other. Damage roughly estimated at \$250,000 was caused by fire which destroyed half of the arcade building in the business district of Victoria last week.

A one-legged bootlegger has been discovered. But, that's nothing wonderful, for bootleggers today are standing on more and stronger legs than their enemy the moral reformers.

He who plants a tree lightens the burdens of his fellow man. He who plants a tree-erect to himself a living monument and makes bold an attempt to leave the world more beautiful than he found it.

The service at the Union church on Sunday night last was benefiting Mothers' Day. An able discourse was delivered by the pastor, Rev. W. T. Young, and a beautiful solo was sung by Mrs. D. A. Howe.
